**3.3. The asset categories in which the Investment Fund can invest, with special reference to the fact whether the application of derivative transactions is permitted for the Investment Fund**

In addition to domestic and international government securities, mortgage bonds and other bonds, the Fund may also keep domestic and international shares in its portfolio. Further possible investment instruments for the Fund are the collective investment securities, deposit and repo transactions, and the application of derivative transactions is also allowed. In the interest of an efficient portfolio design, the Fund may also assume futures positions as well as OTC foreign exchange and interest rate derivatives.

**3.4. Call attention to the item of the Fund rules of the Investment Fund that contains presentation of the risk factors of the Investment Fund**

The risk factors of the Investment Fund are contained in Item 26 of the Fund rules

**3.5. The purpose (implementation of hedging or investment purposes) and possible effect of application of derivative transactions on the development of risk factors**

On behalf of the Fund, the Fund Management Company is allowed to enter into derivative transactions only for the purpose of achieving the investment goals formulated in the Fund rules, for investment assets. Due to their nature, the derivative transactions bear much higher risks, which can be reduced, but they cannot be fully excluded.

Pursuant to provisions relating to investment unit series of the Collective Investment Act, the Fund Management Company can allocate its assets among the investment unit series in the case of transactions aimed at hedging of foreign currency risks, the purpose of which is to reduce the foreign currency risk of specific series of the Fund against the base currency of the Fund.

**3.6. If, on the basis of its investment policy, the consolidated risk exposure of the investment fund against a specific institution, which risk exposure arises from investments in transferable securities or money market instruments issued by that institution, from deposits at that institution and from unlisted derivative transactions, may exceed 20 percent of the assets of the investment fund, call attention to the special risks arising therefrom**

*In accordance with Section 8 (4) of Government Decree 78/2014, the consolidated risk exposure of the Fund cannot exceed 20% of the assets of the Fund.*

**3.7. If the Investment Fund mainly invests in asset categories not belonging to the transferable securities or financial instruments or adapts a certain index, call attention to this element of the investment policy of the Investment Fund**

Not applicable.

**3.8. In the event that, due to the possible composition of the portfolio or to the applicable management technique, the net asset value of the Investment Fund may strongly fluctuate, call attention to this fact**

Not applicable.

**3.9. If, based on the authorisation of the Supervisory Authority, the Investment Fund may invest even 100% of its assets in various transferable securities and money market instruments issued by an EEA Member State, its self-government, by a third country or an international organization in which one or several member states are members, call attention to this fact**

**3.10. Other information regarding the relevant subject**

Results of the assessment of the probable impact of the sustainability risk on the return of the offered financial product:

*(disclosure as per Article 6 (1) a) of the SFDR):*

The return of financial products offered by the Fund Manager, like that of investment funds, may be impacted by sustainability risks (e.g. climate risk, transition risk, extra costs due to the use of fossil fuels). These effects generally occur within a longer investment period, up to 10 years or more, and regarding their results, they may even have a significant impact on the return of a given financial product, thereby possibly deteriorating their performance. (For example, due to increased attention on environmental considerations, a company operating in a given sector, may be subject to a disadvantage if it fails to switch from a “traditional” operating model to a more modern and environmentally sustainable operation method). The above can typically impact the given company’s market perception, and thus its market value in the long run, which factor is duly taken into account by the Fund Manager in the course of the asset selection decisions.

The degree of sustainability risks may differ for each financial product, which the Fund Manager continuously monitors and duly informs investors, as required by law.

In the case of the Fund, the Fund Manager hereby informs investors that the portfolio does not fall into the category of a financial product that promotes specific environmental or social characteristics or a

combination thereof as defined in the SFDR Regulation (EU 2019/2088) or a financial product aimed at a sustainable investment. In selecting the investments upon which this financial product is based, the Fund Manager does not take into account the specific EU criteria for environmentally “sustainable” business activities (Taxonomy Regulation, EU 2020/852), as this product does not intend to meet enhanced sustainability criteria.

#### **4. Accessibility of information to the investors**

##### **4.1. Naming of the place where the prospectus, the fund rules, the key investor information document, the reports serving regular information as well as the announcements designed for extraordinary information, including the information regarding payments to the investors and redemption of investment units can be accessed**

The Fund Management Company publishes all pieces of regular or extraordinary information as well as announcements regarding the Fund at the official publication sites of the Fund. The official Publication sites of the Fund are the websites [www.kozzetetelek.mnb.hu](http://www.kozzetetelek.mnb.hu) and [www.vigam.hu](http://www.vigam.hu).

The public Prospectus as well as the Key Investor Information Document prepared for public issue of the investment units of the Fund can be inspected at the distribution sites and in the headquarters of the Fund Management Company.

##### **4.2. Other information regarding the relevant subject**

Not applicable.

#### **5. Taxation information**

In all respects set out in the table above, the Fund Manager agrees – with special regard to the selection of counterparties, the securities financing transactions, the eligible collateral and the types of assets that may be used – to comply with the Exclusion List and to ensure that the sustainability safeguards are in place. With regard to eligible collateral and securities financing transactions, this means that the Fund Manager will not accept any collateral issued by an entity on the Exclusion List. With regard to Contracting Parties, in addition to the Exclusion List, the Fund Manager will also comply with its own internal regulations for the selection of counterparties and, regarding the types of assets that may be used for transactions, other criteria in addition to the Exclusion List, as detailed in Annex 1 (SFDR Template), will also apply.

Pursuant to Govt Decree 205/2023. (V. 31.) on the alternative application during the state of emergency of Act LII of 2018 on the Social Contribution Tax, natural persons are subject to an obligation to pay social contribution tax on the amount of their interest income as per Section 65 of Act CXVII of 1995 on Personal Income Tax taken into account as the base for the personal income tax payable on interest income – this emergency regulation is in force until 31.07.2024.

Act LII of 2018 on social contribution tax was amended as from 01.08.2024. Pursuant the amendment, the previous temporary emergency rule has been upgraded to statutory status, and, accordingly, natural persons are still subject to an obligation to pay social contribution tax on the amount of their interest income as per Section 65 of Act CXVII of 1995 on Personal Income Tax taken into account as the base for the personal income tax payable on interest income – although no longer under Government Decree 205/2023. (V.31.), but as per Section 1(5) of Act LII of 2018 on the Social Contribution Tax.

**Distribution abroad:** The Fund Management Company calls the investors' attention to the fact that detailed review of the taxation laws is essential in making their investment decision and to the fact that in case of sale to a foreign country, the taxation rules may be different.

### **5.1. Summary of elements of the taxation scheme applicable to the investment fund that can be relevant for the investors**

At the time of preparation of the Prospectus, the profit of the Fund is not encumbered with any tax payment liability in Hungary. If interest rate, dividend or price gain and any other possible earning arises on foreign investments, it may occur that tax is charged on these gains in the source country (in the country where the gain arises). The taxation of gains arising on foreign investments is determined by the internal laws of the relevant country and, if appropriate, the convention for the avoidance of double taxation between the relevant country and Hungary.

At the time of preparation of this Prospectus the investment units are encumbered by special tax. The tax base is quarterly the average asset value of the investment unit series of the Fund and the annual tax rate is 0.05% of the tax base. The tax payable is assessed, collected from the Fund, declared and paid by the Fund Management Company.

### **5.2. Information on the deductions encumbering the yield and exchange gain paid to the investors at the source**

- a) According to the Hungarian legislation effective at the time of the Prospectus, the rate of interest tax payable to domestic private persons on the return of Investment units is 15%, which is deducted by the distributor when they are sold. The investment units can be deposited on a long-term investment account on the yield of which the distributor does not deduct any tax.
- b) According to the Hungarian legislation effective at the time of the Prospectus, the return on Investment units may increase/reduce the taxable revenues of domestic legal persons and business associations without legal personality on which, pursuant to the taxation rules in effect, they have to pay tax. At the time of preparation of the Prospectus, the corporate tax rate is 9% respectively. If, upon request of the Investor, the return on Investment units is broken down, then corporate tax has to be paid only on the exchange gain and interest component of the yield but not on the portion of yield that results from dividends.
- c) Taxation of foreign private persons, legal persons and business association without legal personality: If there is a convention on avoidance of double taxation between Hungary and the own country for taxation of the investment unit holder, then the taxation of the income is subject to the domestic laws or the laws of his own country. In lack of such a convention, the Hungarian tax rules applicable to non-residents apply. The Distributor fulfils the tax deduction obligation on the basis of the relevant taxation convention and the domestic taxation rules.

**7.13. Detailed description of the remuneration policy of the UCITIS management company (such as: method of calculation of the remuneration and benefits, persons responsible for the determination of the remuneration and benefits, if there is a remuneration committee, the names of the members of the remuneration committee)**

At VIG Asset Management, the work of our colleagues creates value for our clients, which is why we have developed working conditions and an incentive system that allows employees who do excellent work to be retained in the long term and also attracts new talent. This requires a competitive remuneration system in addition to work-friendly conditions and ongoing training.

Our remuneration philosophy is based on monitoring the labor market and developing appropriate references. Part of our philosophy is to ensure that employees who meet expectations are adequately remunerated. To this end, in addition to a fixed income, we use variable pay in certain jobs, primarily in the area of asset management and sales.

At the same time, our remuneration policy only supports healthy risk-taking, thus preventing our colleagues from taking excessive risks that go beyond the mandate. The considered risks also include sustainability risks, thus supporting the Group's idea that responsible investment practices can create value in long term. To this end, we make risk indicators part of the interest system, among others, we also use longer-term performance data in the evaluation, and in the case of colleagues with a decisive role in risk-taking (so-called identified), we pay 50% of the variable remuneration, with a three-year deferral. Who. This allows the reward to be reduced or withdrawn in the event of excessive risk-taking after the end of the assessment period. Over the three years, the accrued portion will be invested in key investment funds managed by VIG Asset Manager, strengthening the interest in the good performance of the funds. A designated group of employees may also receive an annual variable salary (bonus) depending on performance. Employees involved in the bonus: members of the Board of Directors, fund managers and analysts, senior colleagues in the sales area, and the head of the finance and settlement area. The Asset Manager intends to reward excellent performance for the employees

involved in this area on personalized terms. Based on the classification of employees working in the above areas, the maximum bonus that can be paid can reach 100 percent of annual income in the case of excellent performance. Maximum performance is achieved when all set goals are exceeded. The setting of personalized goals is the responsibility of the line manager, while its approval is the responsibility of the Chairman and Chief Executive Officer, excluding the job descriptions of the members of the Board of Directors and the identified employees. In their case, the objectives are set under the supervision of Risk Management, while their approval is the responsibility of the Chairman of the Supervisory Board. The fulfillment of the objectives will be assessed, monitored and approved in accordance with the above. In determining the amounts that can be paid out as a bonus, in addition to achieving the individual goals, the size of the bonus frame calculated and approved by the remuneration committee of the VIG Group appears as an additional consideration.

VIG Asset Management Co. has developed and continuously maintains its remuneration policy in such a way that it complies with the sectoral legal requirements governing fund managers and other regulatory requirements, in particular the NBH's recommendation on financial institutions' remuneration policy. In addition to the above, the Fund Manager always takes into account the remuneration principles of the VIG Group during the development of its remuneration rules.

The remuneration policy is approved by the Supervisory Board of VIG Asset Management and is implemented by the Board of Directors, which is audited annually by internal audit

#### **7.14. Summary of remuneration policy of the UCITS Fund Management Company**

For our investors the work of employees of the Fund Management Company creates a value, therefore we developed such working conditions and incentive system by which employees performing excellent work can be maintained for the long run. The monitoring of the labour market and the development of adequate references provides the basis for the Remuneration philosophy of the Fund Management Company. It is also part of our philosophy that employees performing above the expectations should get an adequate remuneration; for this purpose, we apply a variable payment in addition to the fixed income, with special regard to the Asset Management and Sales Departments.
