

VIG Emerging Europe Bond Investment Fund

A series EUR MONTHLY report - 2024 MARCH (made on: 03/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

Last month, the U.S. inflation data came in stronger-than-expected for a second consecutive month, indicating a slowdown in the pace of disinflation. The Bank of Japan made a historical move of ending an era of negative interest rates with a hike and removed yield-curve-control. Meanwhile, Bank of England sounded more convinced to lower rates, while the SNB surprisingly cut. ECB's Lagarde suggested that June remains the most likely timing for the first rate cut. Jerome Powell restated that the Fed has a room to assess the data before deciding to cut rates later this year. The ISM manufacturing index surprisingly moved back above the 50 threshold in March, while services one declined somewhat. OPEC members confirmed their output cuts for the second quarter of the year. EGB and UST yields increased, curves steepened, on strong US data. BTPs recovered their initial weakness, with the 10Y spread to Bund moving back to 140bp. Equity indices returned weak. In the European corporate credit market, senior investment grade spreads tightened slightly, while high yield spreads widened a tad. In FX, EUR-USD rallied back above 1.08, while the JPY and the CNY are still lagging. Brent prices jumped above \$90/bbl as geopolitical tensions in the Middle East escalated. We slightly increased exposure to Kazakhstan, Poland, Romania and Turkey along with closed positions in the U.S. treasury bills while other fund's positions remained unchanged throughout last month.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000706114
Start:	12/11/2007
Currency:	EUR
