

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In the US, the main market-driving event remains the Federal Reserve's interest rate meeting and subsequent press conference. As expected, the key rate was left unchanged, but Jerome Powell made waves at the press conference afterwards. The Fed chairman said, albeit implicitly, that the Fed will no longer aim to keep inflation below 2% and will focus on the unemployment rate. This is a complete reversal of previous statements. Whereas the Fed chairman had previously stressed that his priority was to reduce US inflation, he is now prepared to cut interest rates even if inflation remains higher than expected. This, in turn, puts the investment spectrum on a completely different footing. If the central bank's priority is no longer to reduce inflation, and if it is prepared to cut interest rates because of weak unemployment data, then monetary policy will effectively be reminiscent of the 1970s. Relatively low economic activity and high inflation. That would not be good for anyone, and we can be sure that the markets will test the Fed chairman. In Hungary, the Hungarian National Bank cut its key rate by 75 basis points to 8.25% in March. Vice-president Barnabás Virág said the decision was unanimous. He added that the interest rate will be lowered in smaller increments in the future and that he expects it to be between 6-7% by the summer. The MNB expects inflation to fall to around 5-6% by 2024, and that in the future the forint's appreciation and depreciation will have a greater impact on inflation rates. Following the rate decision, the forint weakened slightly against the euro, rising above the 395 level.

The VIG SocialTrend ESG Equity Investment Fund, which will be launched at the end of February 2024, aims to benefit from long-term demographic shifts and related changes in consumer behavior, with a focus on healthcare and consumer-related sectors. Investments are generally made in companies that have strong fundamentals based on available market data and are likely to create long-term value and competitive advantage through demographic and social change. Currently, innovative healthcare companies are one of the most prominent themes in the portfolio, with a particular focus on weight loss products. We also invest in global companies that are likely to benefit from population growth and ageing, social and economic changes related to healthy lifestyles, urbanization, the expansion and transformation of the global economy due to the emerging middle class, and changing consumption patterns driven by demographic shifts.
