

VIG Emerging Europe Bond Investment Fund

I series HUF MONTHLY report - 2024 JANUARY (made on: 01/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

The ECB didn't make changes into its monetary policy last month. ECB President Lagarde stressed that the first rate cut to be made in the summer but left the door open to an early start to the easing cycle if the data supports the decision. The Eurozone composite PMI for January rose a tad but remained in contractionary territory. In the US, the economy expanded at a strong 3.3% YoY pace in Q4 '23, driven by personal consumption. Later in the month, the Fed also left its monetary policy unchanged, dropping its tightening bias and shifting to a neutral stance. The BoE made a similar move. All three central banks signalled that rate cuts are coming, but probably later than markets expect. In the US, the Employment Cost Index, the Fed's preferred measure of wage growth, pointed to easing wage pressures, while JOLTS job openings rose in December. EU GDP stagnated in the last quarter of 2023, whereas inflation decelerated slightly less than expected. UST and Bund yields fell 10-20bp due to concerns about US regional banks. Huge supply in the euro area was absorbed with very limited pressure on spreads. The January equity rally came to a halt. EUR-USD rebounded towards 1.09. The HUF reversed its losses as the NBH only cut by 75bp, while easing political risks helped the PLN. We slightly increased exposure to Romania and Hungary along with opening positions in Qatar and Saudi Arabia while other fund's positions remained unchanged throughout last month.
