

VIG Emerging Europe Bond Investment Fund

PI series PLN MONTHLY report - 2024 MAY (made on: 05/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

In early May, President Joe Biden ordered an increase in tariffs on imports from China, including EVs, batteries, semiconductors, solar cells and critical minerals. The EC's spring economic forecast estimates Eurozone GDP to raise by 0.8% this year and to accelerate further to 1.4% in 2025. Sovereign bond yields declined moderately on the release. Later in the month, the Eurozone composite PMI for May signalled moderate expansion in Q2 '24, driven by services, while price pressure eased. The minutes of the FOMC's May 1st meeting appeared to be hawkish, while Fed Governor Christopher Waller said he needs to see "several more months of good inflation data" to vote for a rate cut. UK CPI inflation fell less than expected, making a BoE rate cut in June unlikely. In core bond markets, 10Y yields increased by 5-10bps. In the last week of May, Eurozone inflation data surprised to the upside, rising to 2.6% YoY in May from 2.4% in April, due to a rise in services inflation. Former US President Donald Trump was found guilty of falsifying business records in a criminal trial in New York. US consumer confidence picked up last month, but Q1 '24 GDP growth was revised down and the May Beige Book showed that firms' outlooks had deteriorated. Sell off in government bonds continued along with curves bear-steepening. The 10-year Bund yield reached 2.70%. EM debt and corporate-credit spreads remained resilient. Equity markets corrected modestly from recent peaks. EUR/USD was volatile but trendless, while USD/JPY retreated from peaks above 157. EUR/HUF outperformed, moving closer to 390. We moved to neutral positioning in Hungary, Romania and Turkey from lower exposure and slightly added to the Azeri and Serbian exposures, other fund's positions remained unchanged throughout last month.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
