

VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2024 MAY (made on: 05/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In May, there was a turning point in inflation, as year-on-year price increases in Hungary have risen to 4%. This increase is mainly attributed to base effects and the stickiness of services inflation. During the May rate setting meeting the central bank again implemented a 50 basis point rate cut, bringing the key rate to 7.25%. The communication from Barnabás Virág, Deputy Governor of the central bank, did not change significantly regarding the level of base rate at the end of June; the central bank still considers the 6.75-7% range to be realistic. But Patience is needed, as we might experience rising inflation again in the remaining part of the year. During the month, short-term yields slightly decreased. At the 3-month Treasury bill auction at the end of the month, papers could only be obtained at an average yield of 6.8%, but a yield decrease of 6-8 basis points was also observed at the 6 and 12-month auctions. In May, the Government Debt Management Agency (ÁKK) also launched its switch auctions for discount Treasury bills, aimed at preventing the auction average yield from artificially dropping to a low level as larger maturities approach. This allows the exchange of the shortest papers for longer ones to start a few weeks before the more significant maturities, thereby somewhat mitigating the rush for short papers at the end of the quarter.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000702303
Start:	09/25/2002
Currency:	HUF
