

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to create an investment portfolio that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon while achieving the Fund's Sustainability Objectives. With a view to achieving these objectives, the Fund may invest in a variety of instruments, i.e. it holds primarily equity and bond-type instruments, while it may also invest in collective securities and enter into derivative transactions, subject in each case to the relevant investment limits. The fund does not have a geographical specification. In order to realise the investment objectives, the asset groups in the Fund's portfolio may be varied freely, without having to adhere to a predetermined risk profile.

The Fund's investment strategy is based on sustainable value creation, aiming to build an actively managed and sufficiently diverse portfolio that takes into account both sustainability criteria and the fundamentals of the assets held. The Fund's asset allocation strategy is based on the asset allocation model used by the Fund Manager, the Investment Clock, used by the Fund Manager to determine the asset mix with the best risk to return potential at a given point of the economic cycle. In addition to asset allocation, the Fund Manager aims to achieve the financial and sustainability objectives of the Fund through active stock and bond selection policies. Stock selection is based on sustainable growth, through the selection of stocks of companies able to achieve outstanding performance both financially and in terms of ESG risks, thus creating long-term shareholder value. When selecting bonds, the Fund Manager seeks to maximise the proportion of green bond issues, taking into account existing market constraints.

MARKET SUMMARY

In January, markets were still trying to decide whether or not the economic scenario outlined by the Federal Reserve would materialize. Since last November, the Fed has been saying that the economy will be soft landing, despite a 5.25% interest rate and several macroeconomic data points pointing to a recession in the US economy. Investors who positive about the future are looking at how much AI will reform the US economy and what fundamental changes it will bring to the economy. But there are those who believe that the Fed has raised interest rates too high in an attempt to curb inflation and that a recession is inevitable. But if it starts to cut rates because of a potential recession and inflation starts to rise again, the Fed will be backed into a corner. In 2024, the Fed's decisions will be even more influenced by macro data and markets could be more volatile than usual.

The Hungarian National Bank cut its key rate by another 75 basis points to 10.00%. Inflation also continued to fall in November, to 5.5% according to KSH data, and could fall below 5% in January. In December, the National Bank had indicated that it could cut the key rate by up to 100 basis points, but it stuck to 75 basis points due to the weakening forint. Interestingly, after the lower-than-expected rate decision, the forint strengthened and traded below 385 against the euro at the end of the month.

The Fund closed the month up by around 2%. This time equities were the main contributor to the rise. The Fund's equity weighting was around 33% for the month, with Central European equities dominating. Within equities, the strongest performers were Magyar Telekom, Dunahouse, Erste and OTP and Greek equities. Within developed market equities, the rise in the technology and chip sectors had a positive effect on the Fund's performance. At the end of the month we took profits on some positions and increased the weight of put options on the S&P500 index, but the overall equity weighting was not materially affected. Towards the end of the month we temporarily reduced the proportion of open currency positions.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 4%
