

# VIG Polish Bond Investment Fund

A series HUF MONTHLY report - 2024 MAY (made on: 05/31/2024)

## INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

## MARKET SUMMARY

In May, Polish bonds experienced a stronger month: the yield curve moved lower by 2-3 basis points. At the beginning of the month, the Polish central bank kept the base rate unchanged, so it remained at 5.75% in line with market expectations. The communication from the central bank governor remained hawkish, they are satisfied with the current low inflation, which is a result of the success of the monetary policy, but noted that the core inflation is still elevated. Inflation is expected to follow an upward trend in the coming months, potentially reaching 5.5% by the end of the year, according to the central bank's calculations. Currently the inflation is 2,5% year on year in May according to the preliminary estimates, which was already a rebound from the previous month 2.4%, but came well below the market expectations of 2,8%. The Purchasing Managers' Index (PMI) decreased to 45 in May from the previous month's 45.9 arriving below market expectations. The index is still below the 50 threshold, indicating a contraction, as both output and new orders continued to decline due to the uncertain economic environment. Industrial production posted an increase of 7.9% in the fourth month of the year, thus arrived above market expectations. As for the state budget, the government generated a deficit of 15,352.7 million PLN in the fourth month of the year, bringing the 12-month rolling budget deficit to 3.35% of GDP.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% TBSP Index
