

INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty. VIG Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Polish Moneymarket Fund is capable of fluctuation. VIG Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In May, Polish bonds experienced a stronger month: the yield curve moved lower by 2-3 basis points. At the beginning of the month, the Polish central bank kept the base rate unchanged, so it remained at 5.75% in line with market expectations. The communication from the central bank governor remained hawkish, they are satisfied with the current low inflation, which is a result of the success of the monetary policy, but noted that the core inflation is still elevated. Inflation is expected to follow an upward trend in the coming months, potentially reaching 5.5% by the end of the year, according to the central bank's calculations. Currently the inflation is 2,5% year on year in May according to the preliminary estimates, which was already a rebound from the previous month's 2.4%, but came well below the market expectations of 2,8%. The Purchasing Managers' Index (PMI) decreased to 45 in May from the previous month's 45.9 arriving below market expectations. The index is still below the 50 threshold, indicating a contraction, as both output and new orders continued to decline due to the uncertain economic environment. Industrial production posted an increase of 7.9% in the fourth month of the year, thus arrived above market expectations. As for the state budget, the government generated a deficit of 15,352.7 million PLN in the fourth month of the year, bringing the 12-month rolling budget deficit to 3.35% of GDP.
