

VIG Czech Short Term Bond Investment Fund

A series CZK MONTHLY report - 2024 JUNE (made on: 06/30/2024)

INVESTMENT POLICY OF THE FUND

The Fund aims to increase the value of its assets under management and to provide investors with a higher yield than Czech bank deposits and short-term bonds over a period of 1 to 2 years. No individual investor's decisions can be made in the Fund. The Fund Manager selects portfolio elements in accordance with the above principles. When making investment decisions, the tools of fundamental analysis and technical analysis are used, and the current market sentiment is also taken into account. The Fund primarily invests in discount treasury bills issued by the Czech State, sovereign bonds, bonds of quasi-sovereign companies, or bonds or deposit-like instruments issued by the Czech National Bank, the European Central Bank or the central bank of another Member State of the European Union. To a limited extent, the portfolio may include government securities, state-guaranteed bonds, corporate bonds (including those issued by financial institutions) and mortgage bonds with at least investment-grade credit rating. Investments may be made in Czech crowns or, to a limited extent, in other currencies. In the case of assets denominated in a currency other than Czech crowns, the Asset Manager shall strive to fully hedge foreign exchange risks (there cannot be a difference of more than 5% between the currency exposure of the derivative transaction and that of the asset to be hedged).

The Fund may enter into deposit and repo transactions, invest – to a limited extent – in units in collective investment undertakings, and derivatives may as well be used (for the purposes of hedging or building an efficient portfolio).

MARKET SUMMARY

This month brought rather supportive news for Czech short-term bonds. Revised GDP growth came in slightly lower, highlighting subdued investment as ongoing structural challenge that bodes ill for future economic growth. However, these factors support further monetary easing by the CNB. More importantly, the latest headline CPI number did not cross the 3% year-on-year threshold as some analysts feared. Instead, it surprised to the downside, decreasing to 2.6% y/y, which prevented the CNB from adopting a more hawkish stance. The most significant event of the month was the central bank's decision on the base rate. Market odds were close (25 vs. 50bps rate cut) with some bias towards a more cautious approach. However, the Czech National Bank lowered its main interest rate by 50bps to 4.75%, surprising market participants who expected a more modest cut. Five board members voted in favor of Thursday's decision, while the other two preferred a 25bps cut. The economy operating below its potential was likely the persuasive argument for the majority of decision-makers. Despite maintaining a hawkish tone, suggesting the pace of rate cuts will likely slow down at the next meeting, the Governor, somewhat confusingly, did not rule out another 50bps rate cut in August during the Q&A session, stating that the Board wanted to keep all options open. Most analysts expect that the next step will be a 25bps cut, with the base rate potentially settling at 4-4.25% by the end of the year.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
