

# VIG Czech Short Term Bond Investment Fund

A series CZK MONTHLY report - 2024 JULY (made on: 07/31/2024)

## INVESTMENT POLICY OF THE FUND

The Fund aims to increase the value of its assets under management and to provide investors with a higher yield than Czech bank deposits and short-term bonds over a period of 1 to 2 years. No individual investor's decisions can be made in the Fund. The Fund Manager selects portfolio elements in accordance with the above principles. When making investment decisions, the tools of fundamental analysis and technical analysis are used, and the current market sentiment is also taken into account. The Fund primarily invests in discount treasury bills issued by the Czech State, sovereign bonds, bonds of quasi-sovereign companies, or bonds or deposit-like instruments issued by the Czech National Bank, the European Central Bank or the central bank of another Member State of the European Union. To a limited extent, the portfolio may include government securities, state-guaranteed bonds, corporate bonds (including those issued by financial institutions) and mortgage bonds with at least investment-grade credit rating. Investments may be made in Czech crowns or, to a limited extent, in other currencies. In the case of assets denominated in a currency other than Czech crowns, the Asset Manager shall strive to fully hedge foreign exchange risks (there cannot be a difference of more than 5% between the currency exposure of the derivative transaction and that of the asset to be hedged).

The Fund may enter into deposit and repo transactions, invest – to a limited extent – in units in collective investment undertakings, and derivatives may as well be used (for the purposes of hedging or building an efficient portfolio).

## MARKET SUMMARY

This month brought rather supportive news for Czech short-term bonds. New GDP growth data came in lower than expected supporting further monetary easing by the CNB. More importantly, the latest headline CPI number surprised sharply to the downside, decreasing to 2.0% y/y, which prevented the CNB from adopting a more hawkish stance. After June, when the most significant event of the month was the central bank's decision on the base rate (cut by 50bps to 4.75%), in July international developments took center stage. Weak economic data, especially coming from the US led to reassessment of base case scenarios by market participants, no landing odds decreased sharply while hard landing fears stentghened. This led to heightened expectations for rate cuts already in 2024, commodity markets suffered, which provided good support for bond yields, which have fallen significantly. All-in-all, both local and global developments underpin further monetary easing by CNB, even probably another 50bps cut would be justified based on new data, however a 25bps new rate cut is more probable. In either case bond markets are supported and as a result we slightly increased our duration exposure in the fund.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
