

# VIG Emerging Europe Bond Investment Fund

I series HUF MONTHLY report - 2024 JULY (made on: 07/31/2024)

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

## MARKET SUMMARY

Early in the month, the ECB kept rates unchanged but seems like stays on track for another cut in the first month of autumn. Ursula von der Leyen was confirmed as president of the European Commission. The Republican convention nominated Donald Trump as its presidential candidate after the assassination attempt last month. Vice President Kamala Harris informally secured more delegates than the 1,976 needed for her to obtain the Democratic Party's nomination in the US presidential election. The EZ flash composite PMI for the last month surprised to the downside, indicating stalling activity at the beginning of Q3 '24. The German Ifo Business Climate Index fell significantly, with the deterioration being broad-based and the largest setback occurring in manufacturing. In the last week of July, the Fed kept rates on hold but indicated that it might cut rates at its next meeting. The BoE delivered a hawkish 25bp cut, while the BoJ continued to buck the global trend by hiking its policy rate to 0.25%. In the Eurozone, headline inflation inched higher, with core inflation stuck at 2.9% YoY, while GDP growth steadied at 0.3% QoQ in Q2 '24. Demand for core rates remained healthy, with Bund and UST yields declining by 15-25bp. The BTP-Bund spread widened. Focused on partly disappointing corporate earnings, the European stock market came under pressure, while the US market trod water. Credit spreads increased at the end of the month despite continued strong bank earnings. EUR-USD fell just below 1.08, while USD-JPY dropped below 150 following the BoJ's rate hike. EUR-HUF broke above 396, whereas EUR-CZK retreated from YTD highs. We initiated positions in Colombian sovereign bonds and switched to Poland from Qatar on more attractive valuations, other fund's positions remained unchanged throughout last month.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
