

## INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that can profit from long-term demographic changes and the related changes in consumer habits. The Fund aims to achieve long-term capital growth by investing in global companies that can benefit from the growth and aging of the population, the social and economic changes associated with a healthy lifestyle, urbanisation, the expansion of the emerging markets' middle class and the global economic trends stemming from these social changes, as well as the changing consumption habits driven by such demographic changes.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that can benefit from the long-term global demographic changes and related changes in consumer habits. Investments are made in companies that have strong fundamentals and are well positioned for long-term value creation and competitive advantage due to demographic and social changes. Trends related to demographic and social changes are long-term processes that go beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

## MARKET SUMMARY

In July, the US stock market experienced significant volatility. Stocks reached historic highs and then fell back, especially in the technology sector. A strong rotation unfolded, with investors buying winners from previous periods and selling laggards such as smaller capitalization stocks. The main reason for the correction in chipmakers was the new US sanctions imposed on exports to China in the middle of the month. On the macro front, inflation statistics came in better than expected, leading investors to believe a September rate cut as a possibility again. The more favorable inflation trajectory was also reflected in longer yields, with the yield on 10-year US Treasuries falling to around 4.21%. Highlights for Hungarian markets included the Hungarian National Bank's July interest rate decision, which resulted in a 25 basis point cut, as expected, leaving the Hungarian base rate at 6.75%. According to the HNB, the main influence on policymakers was the declining US interest rate expectations, but the June inflation figure of 3.7% was also lower than expected. According to the HNB, there could be another 1-2 rate cuts in 2024, meaning that the Hungarian base rate could fall to as low as 6.25%.

The Fund's strategy is to capitalise on long-term demographic changes and related changes in consumer habits. Currently, innovative healthcare companies are one of the most prominent themes in the portfolio, with a particular focus on companies producing weight loss products. Earlier this month, the FDA approved Ely Lilly's Alzheimer's drug. The quarterly reporting season has also begun and it seems that US consumers are starting to weaken. Several companies have reported that their consumers have become price sensitive, leading many to fear a slowdown in consumer spending, although Bank of America card data show that spending is slightly higher now in nominal terms than this time last year, but in real terms this means that it is broadly flat. Beyond fast food, discretionary goods manufacturers are also suffering, with a slowdown in the housing market and cars priced too high, and appliances, for example, not selling. Sectorally, the largest exposure is in the health care and consumer staples sectors, which are considered defensive, with these two industries accounting for nearly 65% of the Fund.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
