

VIG Hungarian Money Market Investment Fund

I series HUF MONTHLY report - 2024 AUGUST (made on: 08/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In August, Hungarian inflation arrived below market expectations, year on year price increase was 3,4%. At its rate-setting meeting at the end of August, the Monetary Council left the base rate unchanged, so it remained at 6,75%. At the press conference following the meeting, Barnabás Virág emphasized that decisions will continue to be data-driven, with the next decision heavily influenced by the latest inflation data, decisions made by central banks in developed markets, risk assessment, and consumer confidence. The second-quarter GDP data remained unchanged compared to the preliminary figures, but its structure is not promising. Besides weak agriculture and industry, the services sector also failed to show significant growth on a quarterly basis. Thus, the second-quarter GDP growth was mainly attributable to the construction industry. Short-term yields did not change significantly during the month. Due to the larger T-bill maturity in the middle of the month, average yields at the 3-month auction decreased, but there was some normalization afterward, with papers sold at an average yield of 5.75% at the last auction of the month. The average yields at the 6-month and 1-year auctions were in the 5.6-5.7% range.
