

VIG InnovationTrend ESG Equity Investment Fund

I series HUF MONTHLY report - 2024 AUGUST (made on: 08/31/2024)

INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that seeks to benefit from innovation in various industries. The Fund aims to achieve long-term capital growth by investing in global companies that are at the forefront of the use of disruptive technologies and can thus play a leading role in their industries. Disruptive technology refers to innovations or developments that significantly change or disrupt existing industries, business models, products or services. Such trends include, for example, big data (artificial intelligence, cyber security, quantum computers), e-mobility (electric cars and related battery technologies), digitisation and related entertainment (metaverse, e-sports) and, last but not least, fintech and robotics industry breakthroughs.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that show potential for growth through technological innovation. Investments are made in companies that have strong fundamentals and are capable of long-term value creation and achieving competitive advantage through innovation. The investment philosophy is based on the belief that innovation is a key driver of long-term business success and shareholder value. Trends related to technological innovation are long-term processes that extend beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

MARKET SUMMARY

In early August, rising risks of a US recession, monetary tightening by the Japanese central bank and uncertain news about AI combined to contribute to a fall in equity markets at a time when they were already overbought and the rise was being led by a handful of companies. However, as quickly as stocks fell, they also recovered, and by the end of the month the major stock market indices had managed to close near historic highs (the exception being the Nasdaq index, which failed to rise to a new high). One of the key events watched by the market in August was the Nvidia report. In the second fiscal quarter, the company's revenue more than doubled year-on-year to \$30 billion, against analyst expectations of \$28.9 billion, while earnings per share (EPS) came in at 68 cents instead of the expected 64 cents. However, even though Nvidia reported figures that exceeded analyst expectations, the share price fell following the report. Over the past few quarters, investors have become accustomed to seeing the company's reports far exceeding analyst expectations, so the fact that the second quarter results were 'only' slightly ahead of Wall Street expectations proved disappointing. Artificial intelligence companies still make up one of the most prominent themes in the Fund's portfolio, but within this we have shifted away from hardware companies and towards the software industry.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000732987
Start:	02/15/2024
Currency:	HUF
Net Asset Value of the whole Fund:	7,818,273 USD
Net Asset Value of I series:	2,512,397,539 HUF
Net Asset Value per unit:	1.033475 HUF
