

## INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

## MARKET SUMMARY

August started with a correction in developed economies, including the US. Contributing to the downturn was the likelihood of a hard landing in the economy as opposed to a soft landing. On the other hand, the Japanese central bank's interest rate hike in response to the weakening yen negatively affected investors who had leveraged equity positions financed with cheap Japanese yen. This caused a stock market crash in Japan that spilled over to the United States. US Federal Reserve Chairman Jerome Powell has indicated that the Fed may start cutting interest rates from September, but, he sees no justification for a drastic cut. This uncertainty has increased market volatility and many investors have fled into bonds, and yields have fallen. At the end of the month, Nvidia published its second quarter results, which exceeded investor expectations, but the company's less optimistic forecasts were disappointing. Nvidia, seen as the flagship of the artificial intelligence wave, is also being watched by many as the performance of many technology companies could be affected by its month-end report. In Hungary, the MNB's interest rate policy has reached a turning point, as the one-and-a-half-year cycle of rate cuts appears to be coming to an end, with the central bank leaving the base rate at 6.75% at its August policy meeting. This is consistent with declining inflationary pressures, but we do not rule out further rate cuts in the event of weak economic performance. Another important consideration is the forint exchange rate, which has shown considerable volatility recently, so we believe that an implicit moderation of this may have played a role in the decision.

Over the past month, all absolute return and total return funds in the Fund have managed to achieve a slight positive return. During the month, several data points confirmed the slowdown in the US economy, in response to which yields continued to fall, with bond exposure and high interest rate risk helping performance the most, resulting in the MoneyMaxx Fund achieving its highest return in August.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
