MONTHLY report - 2024 AUGUST (made on: 08/31/2024)

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In Switzerland, short-term bond yields decreased further during August, 3 months yields fell by 21 basis points, 1 year yields fell by 11 basis points and 3 year yields decreased by 7 basis points. Inflation was 1.1% compared to the same period last year, arriving somewhat below market expectations; however, on a month-over-month basis inflation was unchanged. The lower print was mainly driven by lower contribution from energy prices. The average inflation for Q3 is 1,2% so far, which is far below the 1,5% forecasted by the Swiss National Bank. Therefore another 25 basis points rate cut in September seems for sure. Economic activity slightly improved, in the second quarter GDP data shows that sport events contributed significantly to growth. GDP growth was 0,5% quarter on quarter (adjusted for sport events), but the unadjusted data increased by 0,7%. Both services and manufacturing contributed positively, but the retail sector appears weak. The economic barometer of the KOF Swiss Economic Institute is still in the growth range, and after the decrease in July the index was able to increase again in August.
