

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

In September, the performance of the Polish bonds was mostly strong: on the 3-year maturity yields decreased by 18 basis points, on the 5 year maturity yields decreased by 26 basis points and on the 10 year maturity yields decreased by 18 basis points compared to the beginning of the month. We only saw increasing yields on the very short end, yields increased on the 1 year maturity by 35 basis points. The base rate is still at 5.75% and at the rate setting meeting in the beginning of October it was left unchanged as well. Currently the inflation is 4.9% year on year in September according to the preliminary estimates, thus marked the sixth consecutive month of rising consumer prices and it was mainly driven by higher food and electricity prices. The growing inflation is hindering the central bank from starting the rate cut. However, once the trend reverses, rate cuts could begin, with the earliest expected around mid-2025. The Purchasing Managers' Index (PMI) rose to 48.6 in August from the previous month's 47.8 arriving above market expectations. Thus the index remained in contraction territory for the 29th consecutive month. New orders are still in a declining trend although the pace of decline is slowing. Employment has started to stabilize. Industrial production posted a fall of 1.5% in the eighth month of the year. As for the state budget, the government generated a deficit of 5,882.8 million PLN in the eighth month of the year, bringing the 12-month rolling budget deficit to 4.52% of GDP.
