

INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that seeks to benefit from innovation in various industries. The Fund aims to achieve long-term capital growth by investing in global companies that are at the forefront of the use of disruptive technologies and can thus play a leading role in their industries. Disruptive technology refers to innovations or developments that significantly change or disrupt existing industries, business models, products or services. Such trends include, for example, big data (artificial intelligence, cyber security, quantum computers), e-mobility (electric cars and related battery technologies), digitisation and related entertainment (metaverse, e-sports) and, last but not least, fintech and robotics industry breakthroughs.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that show potential for growth through technological innovation. Investments are made in companies that have strong fundamentals and are capable of long-term value creation and achieving competitive advantage through innovation. The investment philosophy is based on the belief that innovation is a key driver of long-term business success and shareholder value. Trends related to technological innovation are long-term processes that extend beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

MARKET SUMMARY

The US economy was hit by several headwinds in October. Macro data during the month, such as productivity growth and the downward trend in inflation, confirmed the robustness of the US economy. Better-than-expected unemployment and services data led to a strengthening of the dollar, breaking the previous weakening trend. The overall economic picture is beginning to resemble the coveted soft-landing narrative, which should give rise to optimism in markets. The equity market was driven most by the semiconductor and artificial intelligence sectors, with smaller market capitalization companies tending to move sideways. Oil prices rose earlier in the month on fears of escalation in the Middle East and have since moderated. In the bond markets, yields rose to multi-month highs as both presidential candidates are expected to add to already high government debt. Investors are now mostly looking forward to the presidential election on November 5th, and the subsequent Fed rate decision, of which the outcome will strongly determine the economic outlook. Even within the sectors, there have been massive divergences in performance recently, with spectacular examples in the semiconductor sector, where Nvidia managed to reach new historic highs while several of its competitors suffered in October. Taking advantage of these opportunities, we have also been active in our individual equity investments this month, increasing our weighting in cyber defense companies and several software companies after we believe their AI-related developments have the potential to deliver significant revenue potential. In October, we also published our quarterly report on some of the Fund's largest investments. Tesla and Alphabet had a strong quarter, with Tesla's profits beating expectations, helped in part by the sale of decarbonisation credits. Alphabet's revenue and earnings per share also beat analysts' estimates, mainly due to growth in cloud services. Meta also posted good results, but its user numbers were below expectations and it plans significant capital investments in the coming years. In contrast, Microsoft's cloud business showed slowing growth, which overshadowed otherwise positive revenue results. Artificial intelligence companies still make up one of the most prominent themes in the Fund's portfolio.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
