

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

In October, the performance of the Polish bonds was weak: on the 3-year maturity yields increased by 40 basis points, on the 5 year maturity yields increased by 66 basis points and on the 10 year maturity yields increased by 68 basis points compared to the beginning of the month. We only saw decreasing yields on the very short end, yields declined on the 1 year maturity by 26 basis points. The base rate is still at 5.75% and at the rate setting meeting in the beginning of November it was left unchanged as well. Currently the inflation is 5% year on year in October according to the preliminary estimates, thus marked the seventh consecutive month of rising consumer prices and it was mainly driven by higher food and electricity prices. The growing inflation is hindering the central bank from starting the rate cut. However, once the trend reverses, rate cuts could begin, with the earliest expected around mid-2025 or March next year. The Purchasing Managers' Index (PMI) rose to 49.2 in September from the previous month's 48.6 arriving above market expectations. Thus the index remained in contraction territory for the 30th consecutive month. New orders are still in a declining trend, but employment and output started to rise. Industrial production posted a fall of 0.3% in the ninth month of the year. As for the state budget, the government generated a deficit of 16,634.8 million PLN in the ninth month of the year, bringing the 12-month rolling budget deficit to 4.52% of GDP. During the month we had slight underweight duration exposure, which proved to be a good decision.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% TBSP Index
