# VIG Polish Bond Investment Fund

#### MONTHLY report - 2024 NOVEMBER (made on: 11/30/2024) P series PLN

# INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

### MARKET SUMMARY

In November, the performance of the Polish bonds was surprisingly strong: on the 3-year maturity yields decreased by 29 basis points, on the 5 and 10 year maturities yields decreased by 43 basis points compared to the beginning of the month. We only saw increasing yields on the very short end, yields rose on the 1 year maturity by 47 basis points. The base rate is still at 5.75% and at the rate setting meeting in the beginning of December it was left unchanged as well. Currently the inflation is 4.6% year on year in November according to the preliminary estimates, thus the pace of price increases decreased slightly. Food and energy prices continued to rise, but a decrease was observed in fuel prices. Due to the extension of the energy price freeze, inflationary risks are being pushed further out, prompting the Governor of the Central Bank, Adam Glapiński to emphasize surprisingly in his speech that the rate cut cycle may also begin later, despite the recently weaker macro data. The Purchasing Managers' Index (PMI) fell to 48.9 in November from the previous month's 49.2 arriving below market expectations. Thus the index remained in contraction territory for the 31st consecutive month. New orders declined more significantly, and weak European demand also impacted export orders. Industrial production posted a rise of 4.7% in the tenth month of the year. As for the state budget, the government generated a deficit of 22,503.2 million PLN in the tenth month of the year, bringing the 12-month rolling budget deficit to 5% of GDP.
