

## INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

## MARKET SUMMARY

The result of the US presidential election was the main event that moved markets in November. Trump's victory can be explained, among other things, by the poor economic performance perceived by voters, who said that inflation and economic growth were the most important factors in their vote. This is interesting because the US economy is expanding at a steady 2.7% year-on-year rate, and inflation (2.6%) and unemployment are at low levels. Trump's election triggered a stock market rally on expectations of a looser regulatory environment and other business support measures. Bond yields reacted with a sharp rise on expected proposals by the President-elect to increase the public deficit, but this receded during the month. In general, markets have seen high volatility, driven by Trump's protectionist tariff policy plan and general policy uncertainties. The Fed's 25bp rate cut was in line with expectations, with analysts expecting a further rate cut by the end of the year. Economic growth in Europe remains relatively weak, but inflation is stabilizing at low levels. The US presidential election and Trump's draft tariff policy have had a negative impact on growth prospects in Europe, especially in the automotive sector. Tariffs towards China are also hampering the recovery of European industry, reflected for example in weak German manufacturing figures. The green transition is an ongoing issue, where the trade war with China is negatively affecting the supply of solar panels, a key element of net zero climate targets. Over the past month, all absolute return funds in the Fund have achieved positive returns. Returns were helped mainly by the weakening of the forint and the rise in equity markets, which offset the losses realized on our bond investments as a result of the rise in yields.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
