Call **+36 1 477 4814** for more information!

VIG Asset Management Hungary Closed Company Limited by Shares is supervised by the **National Bank of Hungary** with respect to this document containing key information.

## What is this product?

**Type:** public, open-ended, harmonised in accordance with the UCITS Directive. **Currency of the series:** EUR **Custodian:** Erste Bank Hungary Zrt.

**Benchmark:** The Fund has no benchmark index. **Term:** A The fund has an indefinite term, and does not expire, so the investment fund shares can be redeemed at any time.

**Objective:** The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDR regulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on sustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market reem corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations. The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR) at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

**The main factors influencing the Fund's returns:** The main factors influencing the Fund's returns are: changes in the prices of financial instruments in the Fund's portfolio, the risks assumed by the Fund, gains/losses arising from the currency exposure within the Fund, changes in the interest rate environment, and changes in the Fund's operating and other costs. The Fund can achieve returns through the appreciation of financial instruments in its portfolio. The calculation of the Fund's returns is based on Appendix 3 of Bszt. (Act CXXXVIII of 2007).

**Yield, yield payment:** The Fund does not pay yield against the capital growth, and the entire capital growth will be reinvested in accordance with the Fund's investment policy. Investors can realise the capital growth as the difference between the purchase and redemption prices of the Investment Fund Shares they own, as a price gain.

**Information about sustainability:** The Fund qualifies as a financial product with a sustainable investment goal (SFDR 9).

**Intended retail investor:** in certain cases, this fund is not suitable for investors, who want to withdraw their money within the recommended retention period.

**Termination of the Fund:** The fund manager is obligated to terminate the public open-ended investment fund if the average equity of the fund is lower than twenty million forints over a period of three months. The rules concerning the termination of the Fund, the sale of the Fund's assets, and the disbursement of the estate are set out in Sections 75-79 of Act XVI of 2014 on Collective Investment Trusts and Their Managers and on the Amendment of Financial Regulations.

## What are the risks and what could I get in return?

**Risk indicator:** The summary risk indicator provides guidance regarding the risk level of this product compared to other products. It shows the likelihood that the product will cause financial loss due to the movements of the markets or because we are unable to pay you.

The summary risk indicator presents the risk/profit ratio of the product based on the summary of the market risk indicator calculated from past returns. Historic data are not necessarily

reliable indicators of the future risk profile, however, so this may change over time. Not even the lowest risk category can be understood as a fully risk-free investment. This product does not include protection against future market performance, so you may lose a part or all of your investment. If we are unable to pay the amount due to you, you may lose your entire investment.

The risk indicator assumes that you keep the product until the end of the recommended retention period (3 years). The actual risk may be significantly higher if you redeem the product earlier, and it is possible that you get back a lower amount. The product is classified into the second, low risk class of the 7-tier risk scale, because it is not at all likely that bad market conditions during the implementation of the Fund's investment policy will affect the Fund's ability to pay you. The yield that you may realise from this product depends on future market performance. Future market developments are uncertain and cannot be predicted accurately.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/a suitable benchmark over the last 10 years. Future market developments may vary.

Investment: once 10 000 EUR		If you exit after 1 year	If you exit after the recommended holding period (3 years)
Stress scenario	What you might get back after costs	8435 EUR	8332 EUR
	Annual average return	-15,64%	-5,90%
Unfavorable scenario	What you might get back after costs	8511 EUR	8437 EUR
	Annual average return	-14,88%	-4,15%
Moderate scenario	What you might get back after costs	9930 EUR	9758 EUR
	Annual average return	-0,69%	-0,60%
Favourable scenario	What you might get back after costs	11033 EUR	10896 EUR
	Annual average return	10,33%	2,16%

This table shows the amount of money you can get back at the end of the first year and at the end of the recommended holding period in accordance with the different scenarios, assuming that you invest 10 000 EUR. The “unfavourable” scenario type reflects the most unfavourable development of the value of the product with respect to investments made between January 2014 and January 2024. The “moderate” scenario type reflects the average development of the value of the product with respect to investments made between January 2014 and January 2024. The “favourable” scenario type reflects the most favourable development of the value of the product with respect to investments made between January 2014 and January 2024. The numbers presented include all costs of the product itself (though they may not include all the costs that you may be paying to your consultant or distributor). The numbers do not take into account your personal tax situation, which may also influence the amount you get back. The stress scenario shows the amount you can get back from the invested capital in case of extreme market circumstances.

### What happen if the Fund Manager is unable to pay?

The potential insolvency of the Fund Manager does not jeopardise the repayment of the investors' savings in the Fund. If, based on the contract between the investor and the VIG Asset Manager – as Head Distributor – or the investment service provider managing the securities account, the VIG Asset Manager or the contracted service provider is unable to release to the investor the security held for the investor, the **Investment Protection Fund (by its Hungarian abbreviation: “BEVA”)** undertakes to be liable for indemnification. BEVA's indemnity obligation will become effective if the Supervisory Authority initiates liquidation proceedings against the BEVA member based on the law, or a court orders the liquidation of the BEVA member. The insurance provided by BEVA will not cover losses arising from the change of value of the investment. BEVA will pay the claim of the investor entitled to indemnification for up to an amount of one hundred thousand euros (in aggregate per person and investment enterprise, i.e., per BEVA member). The rate of the indemnity to be paid by the Fund is one hundred percent up to an amount of one million forints, and is one million forints and ninety percent of the portion above one million forints in the case of claims exceeding one million forints.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time** The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product [and how well the product does (where applicable)]. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10 000 EUR is invested.

	If you exit after 1 year	If you exit after the recommended holding period (3 years)
Total costs	104 EUR	594 EUR
Annual cost impact (*)	1,04%	1,04%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0,44% before costs and -0,60% after costs.

### Composition of costs

One-off costs upon entry or exit	Entry costs	maximum 5.0%	This includes distribution costs equivalent to 5% of the invested amount (500 EUR) This is the maximum amount charged to you. The person selling the product to you will inform you about the actual fee.
	Exit costs	maximum 3.5%	3.5% of your investment before it is paid to you.
Ongoing costs	Management fees and other administrative or	1,04%	1,04% of the annual value of your investment. This is an estimate based on the actual costs of the past year

(taken each year)	operative costs		
	Transaction costs	0,00%	0,00% of the annual value of your investment. This is an estimate based on the costs incurred during our purchase and sale of investments on behalf of the product. The actual amount will vary depending on how much we buy and sell.
Incidental costs	Performance fees	None.	There is no performance fee for this product.

## How long should I hold it and can I take money out early?

**Recommended holding period: 3 years**

The Product has no cooling-off or withdrawal period, as its term is indefinite being open-ended, i.e., it can be redeemed at any time. This Fund is not suitable for investors who intend to reclaim their money from the fund within the minimum recommended investment time. If any holder of the Investment Fund Share(s) places a redemption or conversion order for the investment fund shares of the same investment fund within 10 sales days of the time of the purchase or conversion order (T+10), the distributors will charge a penalty premium of 2% in excess of the regular premium, which will be paid to the Fund. The time interval required for the penalty premium to apply shall be determined based on the FIFO principle.
