

VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2024 DECEMBER (made on: 12/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In December, Hungarian inflation accelerated to 4.6%, thus exceeding market expectations. As a result, the average annual price increase for 2024 was 3.7%. At its December rate-setting meeting, the Monetary Council left the key interest rate unchanged, with the base rate closing the year at 6.5%. The press conference following the meeting adopted a hawkish tone. According to the Monetary Council's communication, inflation may peak at around 4.6% in the first quarter of 2025, after which disinflation could resume in Hungary. In the new inflation report, the inflation forecast for 2025 was revised upward due to the depreciation of the forint and various tax increases, while GDP growth for 2024 is now expected to range between 0.3– 0.7%. However, there is more optimism for GDP growth in the following year, primarily due to the low base in 2024 and the fruition of large-scale investments. According to the communication, the economy could show an annual growth rate of around 4– 5% in the second half of 2025. Throughout the month, technical effects similar to those seen in previous years influenced the short end of the yield curve. Due to year-end factors, the 3-month reference yield decreased by 61 basis points to 5.1%, while the 6- and 12-month reference yields ended the year around 5.25%. The fund successfully closed the year, outperforming the benchmark by 23 basis points.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
