

VIG Developed Markets Government Bond Investment Fund

I series HUF MONTHLY report - 2025 JANUARY (made on: 01/31/2025)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

After delivering a 1% of rate cuts last year, the FOMC voted unanimously on its January meeting to hold the federal funds target range steady at 4.25-4.50%. During his press conference, Jerome Powell said on at least five separate occasions that the Committee did not need to be "in a hurry" to make further adjustments to policy rates. US equities moved lower after hitting record highs the last month, driven by an AI-led correction. Eventually, US equities ended the month with a gain of slightly less than 3% amid generally solid earnings and the Fed decision to hold interest rates. European equities recorded their strongest monthly gains since November 2023. The ECB delivered a widely expected 25bp interest-rate cut at its latest meeting and guided for a further reduction in March due to concerns about economic growth. Amid falling bond yields, majority of all the key fixed income assets posted gains. Oil prices fell as US inventory data showed a surprisingly strong increase. In contrast, gold reached an all-time high, touching \$2,800/oz on safe-haven grounds. Most of the major currencies declined against the USD except JPY on tariff speculation. Comments from the BoJ's deputy governor Himino helped push the JPY higher as the BOJ keeps the door open to a sequence of future rate hikes. All key EM currencies declined as well. MXN was the worst performing currency against the USD after the US President announced 25% tariffs on Mexico and Canada.

Last month, we increased USD positions via buying T-Bills, TIPS and T-Bonds as well. We have also bought some Canadian bonds. Thus, we have increased the fund's duration in January and we have turned tactically constructive on rates as the new US administration has strong commitment to decrease oil prices, which could lead to lower CPI and bond yield environment.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% Bloomberg Global Treasury Majors ex Japan Total Return Index Unhedged USD
