

INVESTMENT POLICY OF THE FUND

The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDR regulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on sustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market green corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations. The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR) at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

MARKET SUMMARY

After delivering a 1% of rate cuts last year, the FOMC voted unanimously on its January meeting to hold the federal funds target range steady at 4.25-4.50%. During his press conference, Jerome Powell said on at least five separate occasions that the Committee did not need to be "in a hurry" to make further adjustments to policy rates. US equities moved lower after hitting record highs the last month, driven by an AI-led correction. Eventually, US equities ended the month with a gain of slightly less than 3% amid generally solid earnings and the Fed decision to hold interest rates. European equities recorded their strongest monthly gains since November 2023. The ECB delivered a widely expected 25bp interest-rate cut at its latest meeting and guided for a further reduction in March due to concerns about economic growth. Amid falling bond yields, majority of all the key fixed income assets posted gains. Oil prices fell as US inventory data showed a surprisingly strong increase. In contrast, gold reached an all-time high, touching \$2,800/oz on safe-haven grounds. Most of the major currencies declined against the USD except JPY on tariff speculation. Comments from the BoJ's deputy governor Himino helped push the JPY higher as the BOJ keeps the door open to a sequence of future rate hikes. All key EM currencies declined as well. MXN was the worst performing currency against the USD after the US President announced 25% tariffs on Mexico and Canada. Last month, we remained optimistic on Eurozone rates and initiated only some fine-tuning in the fund composition. We have turned tactically constructive on global rates in January as the new US administration has strong commitment to decrease oil prices, which could lead to lower CPI and bond yield environment. Eurozone bonds should be supported by further European Central Bank rate cuts going forward.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
