

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In January, Hungarian inflation surged to 5.5%, exceeding all expectations. Several factors contributed to the rise in inflation: the usual January repricing, the inflation-linked increase in excise duties, and the passing on of banking transaction costs to consumers, all of which took effect in January. However, the primary drivers of the price increase were the further rise in food prices and a larger-than-expected correction in service sector inflation. At its January rate-setting meeting, the Monetary Council did not change the policy rate, leaving the base rate at 6.5%. The central bank's communication remained hawkish, making it almost certain that the rate-cutting cycle will not resume before the change of central bank governor in March. According to the latest data, the technical recession in the Hungarian economy ended in the last quarter of 2024. GDP grew by 0.4% year-on-year, while the Central Statistical Office measured a 0.5% expansion compared to the previous quarter. This resulted in a 0.5% economic growth rate for 2024. However, analysts are more optimistic about this year's GDP growth, expecting an increase of 2-3% in 2025. During the month, short-term yields normalized. The 3-month reference yield rose by 74 basis points to 5.85%, while the 6-month and 12-month reference yields closed the month at 5.83% and 5.92%, respectively. As a result, the gap between short-term discount treasury bill yields and the base rate narrowed significantly. The fund started the year underweight due to potential normalization, which proved to be a good decision given the rise in yields.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
