VIG InnovationTrend ESG Equity Investment Fund

B series HUF

MONTHLY report - 2025 JANUARY (made on: 01/31/2025)

INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that seeks to benefit from innovation in various industries. The Fund aims to achieve longterm capital growth by investing in global companies that are at the forefront of the use of disruptive technologies and can thus play a leading role in their industries. Disruptive technology refers to innovations or developments that significantly change or disrupt existing industries, business models, products or services. Such trends include, for example, big data (artificial intelligence, cyber security, quantum computers), e-mobility (electric cars and related battery technologies), digitisation and related entertainment (metaverse, e-sports) and, last but not least, fintech and robotics industry breakthroughs.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that show potential for growth through technological innovation. Investments are made in companies that have strong fundamentals and are capable of long-term value creation and achieving competitive advantage through innovation. The investment philosophy is based on the belief that innovation is a key driver of long-term business success and shareholder value. Trends related to technological innovation are long-term processes that extend beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

MARKET SUMMARY

January saw the start of the fourth quarterly corporate reporting season in the US equity markets. The S&P 500 companies are forecast to post earnings growth of more than 11%, while it is questionable whether high profit margins above nominal GDP growth will be maintained. The change in the yield environment was a key factor, with the US 10-year Treasury yield reaching 4.8%, putting pressure on equity markets. The dollar remained extremely strong, which may not be conducive to US economic policy in the long term. Fed policymakers remained cautious: on the January meeting, in line with market expectations they did not cut the base rate. Inflation data showed a mixed picture, with core inflation rising on a monthly basis in December, which could point to strong wage pressures. European markets were volatile on inflation data and interest rate expectations. Inflation in December was higher than expected in several countries - 2.9% in Germany, for example - reducing the European Central Bank's (ECB) room for maneuver in cutting interest

The Fund's price continued to rise in January, with the largest contribution coming from companies in the communication sector, while hardware manufacturers had the most negative impact on returns. At the end of January, the emergence of China's DeepSeek in generative artificial intelligence disrupted an already volatile market. Reports suggest that DeepSeek could compete with leading AI solutions significantly more efficiently and at a lower cost, which led to a 17% drop in Nvidia's stock price in a single day. Other chipmakers also suffered substantial declines, as DeepSeek's advancements cast doubt on the absolute necessity of high-end chips for Al development. Additionally, Microsoft, Meta, and Tesla released their quarterly earnings at the end of the month. The key message from these companies was that they are continuing Al-related investments at the same pace, unaffected by DeepSeek's emergence, with the goal of maintaining leadership in AI. At this point, it seems that competition in AI will likely intensify further, especially after Alibaba also announced a strong challenger in Al development. We believe caution remains warranted in the chipmaking sector, while software companies utilizing AI solutions could actually benefit from DeepSeek's emergence. As a result, we have adjusted our portfolio allocation in that direction. Al-related companies continue to be one of the Fund's most prominent themes, particularly software developers and cybersecurity firms.

GENERAL INFORMATION

VIG Investment Fund Fund Manager: Management Hungary Custodian: Erste Bank Hungary Zrt. VIG Investment Fund Main distributor:
