■ VIG MegaTrend Equity Investment Fund

R series HUF MONTHLY report - 2025 JANUARY (made on: 01/31/2025)

INVESTMENT POLICY OF THE FUND

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's

MARKET SUMMARY

January saw the start of the fourth quarterly corporate reporting season in the US equity markets. The S&P 500 companies are forecast to post earnings growth of more than 11%, while it is questionable whether high profit margins above nominal GDP growth will be maintained. The change in the yield environment was a key factor, with the US 10-year Treasury yield reaching 4.8%, putting pressure on equity markets. The dollar remained extremely strong, which may not be conducive to US economic policy in the long term. Fed policymakers remained cautious: on the January meeting, in line with market expectations they did not cut the base rate. Inflation data showed a mixed picture, with core inflation rising on a monthly basis in December, which could point to strong wage pressures. European markets were volatile on inflation data and interest rate expectations. Inflation in December was higher than expected in several countries - 2.9% in Germany, for example - reducing the European Central Bank's (ECB) room for maneuver in cutting interest rates. In bond markets, the rise in UK yields and the weakening of sterling raised concerns, with some analysts suggesting that the situation is similar to sell their assets

The Fund closed the first month of the year with strong returns, driven primarily by software companies, uranium mining firms, and the rebound in the healthcare sector. At the end of January, the rise of China's DeepSeek generative artificial intelligence disrupted an already dynamic market. Reports suggest that DeepSeek could compete with leading Al solutions significantly more efficiently and at a lower cost. This development triggered a 17% drop in Nvidia's stock price in a single day. Other chipmakers also suffered substantial losses, as DeepSeek's emergence raised questions about the necessity of high-end chips for Al development. Additionally, Microsoft, Meta, and Tesla released their quarterly earnings at the end of the month. The key takeaway from these companies was that they remain committed to Al-related investments, unaffected by DeepSeek's emergence, as they aim to maintain leadership in the Al space. As things stand, the competition in the Al sector is expected to intensify further, especially with Alibaba announcing another strong Al challenger. We believe caution is still warranted in the chipmaking industry, while software companies leveraging Al could benefit from DeepSeek's entry into the market. Accordingly, we have adjusted our Al megatrend allocation to favor software firms in this space.

GENERAL INFORMATION

Fund Manager: VIG Investment Fund Management Hungary

Custodian: Unicredit Bank Hungary Zrt.

Main distributor: VIG Investment Fund

Management Hungary

Benchmark composition: 100% MSCI AC World Daily Total

Return Net USD Index

ISIN code: HU0000724646

Start: 06/02/2020
