

## INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty.

VIG Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Polish Moneymarket Fund is capable of fluctuation. VIG Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

## MARKET SUMMARY

The performance of the Polish bonds was mixed in the first month of 2025: on the 3-year maturity yields increased by 5 basis points and on the 5-year maturity yields increased by 8 basis points. At the long end of the yield curve however, we saw yields falling by 5 basis points. The base rate is still at 5.75% and at the rate setting meeting in January it was left unchanged as well. Despite maintaining a strict communication stance, the market is pricing in a 90-basis-point rate cut for this year and a cumulative 150-basis-point cut by the end of 2026. The Polish economy grew by 2.9% in 2024, making it an outperformer in the Central and Eastern European region. This improved performance was mainly driven by the recovery in consumer spending. The Purchasing Managers' Index (PMI) rose to 48.8 in January from 48.2 the previous month, exceeding market expectations. However, the index has remained below the 50-point threshold for the 33rd consecutive month. While output and new orders continued to decline, the pace of contraction has slowed. Industrial production recorded a 0.2% increase in the final month of the year. Following last year's record-high issuance, another strong wave of bond issuance is expected this year. For the first time since COVID, multiple short-term government securities are planned to be issued again, which could slightly push up the short end of the yield curve.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% WIBID 1M Index
