

VIG Czech Short Term Bond Investment Fund

A series CZK MONTHLY report - 2025 FEBRUARY (made on: 02/28/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to increase the value of its assets under management and to provide investors with a higher yield than Czech bank deposits and short-term bonds over a period of 1 to 2 years. No individual investor's decisions can be made in the Fund. The Fund Manager selects portfolio elements in accordance with the above principles. When making investment decisions, the tools of fundamental analysis and technical analysis are used, and the current market sentiment is also taken into account. The Fund primarily invests in discount treasury bills issued by the Czech State, sovereign bonds, bonds of quasi-sovereign companies, or bonds or deposit-like instruments issued by the Czech National Bank, the European Central Bank or the central bank of another Member State of the European Union. To a limited extent, the portfolio may include government securities, state-guaranteed bonds, corporate bonds (including those issued by financial institutions) and mortgage bonds with at least investment-grade credit rating. Investments may be made in Czech crowns or, to a limited extent, in other currencies. In the case of assets denominated in a currency other than Czech crowns, the Asset Manager shall strive to fully hedge foreign exchange risks (there cannot be a difference of more than 5% between the currency exposure of the derivative transaction and that of the asset to be hedged).

The Fund may enter into deposit and repo transactions, invest – to a limited extent – in units in collective investment undertakings, and derivatives may as well be used (for the purposes of hedging or building an efficient portfolio).

MARKET SUMMARY

In the Czech Republic, inflation further slowed in February. According to preliminary data, prices rose by 2.7% year-on-year, which was in line with market expectations. At the rate setting meeting on February 6, the Czech National Bank cut the base rate by 25 basis points, bringing it to 3.75%. The decision was unanimous, but they emphasized that they would be cautious regarding further rate cuts. According to the central bank's new forecast, weaker growth is expected this year, and the 2025 growth forecast was reduced to 2%, down by 0.4 percentage points compared to the November projection. Regarding inflation, the statement highlighted that upside risks are more likely, so monetary policy communication may remain hawkish in the long term. However, the goal is to keep real interest rates in positive territory. During February, Czech short-term bond yields increased. The 2-year bond yield rose by 18 basis points, while the 3-year bond yields remained unchanged.
