

INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty. VIG Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Polish Moneymarket Fund is capable of fluctuation. VIG Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

The performance of the Polish bonds was strong in the February: yields fell by 6 basis points on the 3-year maturity, and by 10 and 8 basis points on the 5- and 10-year maturities, respectively. The base rate is still at 5.75% and at the rate setting meeting in February it was left unchanged as well. Although no rate cuts are expected in the near future, a somewhat softer tone could be detected in the central bank governor's communication. They do not know when, but rate cuts will eventually come. Inflation in Poland also started the year with an increase, with a year-on-year price rise of 5.3% in January. The higher than market consensus price increase was mainly driven by higher food, energy, and fuel costs. The Purchasing Managers' Index (PMI) rose to 50.6 in February from 48.8 the previous month, exceeding market expectations. This is the first time since April 2022 that the index has moved above the 50 threshold, placing it in the expansion territory. Both output and new orders increased, and exports declined at a slower pace. Industrial production fell by 1% in the first month of the year. As for the state budget, the government generated a deficit of 3,205.6 million PLN in the first month of the year, bringing the 12-month rolling budget deficit to 6.5% of GDP.
