Currency: HUF
Benchmark: 100% ZMAX
Net Asset Value (HUF): 6 325 480 832
Net Asset Value per share: 1.719798

Investment Policy of the Fund:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this the fund is only allowed to hold very safe investments like t-bills and Hungarian government bonds which duration is lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low, much lower than the volatility of a bond fund, which can contain longer government bonds as well. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or who wants to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money between investments, or for investors who are looking for a so-called safe havens in case of market panics.

Market Summary:

A strong decrease of forint short yields was observed on the money market in September. The market expected the

The asset allocation of the Fund, 30.09.2009

Hungarian T-bills	79.72%
Hungarian Government Bonds	7.67%
Government paper repo	1.11%
Current account	10.22%
Other assets	1.29%
Total investment assets	100.00%
Net corrected leverage	9.70%
Derivative products	0.00%

continuation of aggressive interest rate reduction cycle from the Central Bank side, because of the favorable global market sentiment, the strong forint and declining inflationary pressures. The yields of the short instruments have been decreased 80-90 basis points in the previous period. Despite of the market consensus, the central bank has cut the base rate only by a further half percent (current rate: 7.5%), but the expectations have not changed significantly, more rapid monetary easing is priced in, by the end of the year. We strongly believe, by keeping longer duration in the Fund (vs the benchmark), our investors will better benefit from the yield remission.
