Other assets	-4.74%
Total investment assets	100.00%
Net corrected leverage	26.50%
Derivative products	1.47%

Market Summary:

Equity markets were suffering in May because of concerns about the impact on global economic growth of Europe's sovereign debt problems and China's efforts to cool the overheated housing market. Ironically, the drop in share prices came when macro and corporate earnings data improved. MSCI Far East ex-Japan Index declined by 8.9% in USD terms in May, but was flat in HUF terms since the fund benefitted from the weakening Hungarian currency. Chinese equities underperformed (-9.7% in CNY terms), Indian shares outperformed (-3.5% in INR, +2.2% in HUF terms) the average. Our current neutral view is maintained until there will be more signs that the potential contagion of sovereign problems will settle down and the strong recovery would continue (positive) or slow down the global economy.

NET Yield Performance of the Fund:

Time horizon	12 months	2009 year	2008 year
Net return of the Fund ^a HUF	19.58%	26.50%	-34.82%

Investment Policy of the Fund:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 10% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.
