Capital protection: 0.009122

MAIN DISTRIBUTOR

AEGON Magyarország Befektetési Jegy Forgalmazó Zrt.

INVESTMENT POLICY OF THE FUND

The AEGON Hungary Fund Management Co. has launched this new derivative investment fund to provide an alternative solution for investors, who are expecting a decline of the share prices on the Polish Stock Market. The Fund offers 90% capital protection by a significant share of Polish Treasury Notes. In case of declining share prices the Fund ensures by its WIG20 put option exposure that the investor will get an extra return on his investment. If the fund manager expects that the stock market will go up then he reduces the options position, but if he sees higher risk in the stock market then he will buy more put options for the WIG20 index. Since the capital protection allows the fund manager to buy only a limited amount of put options, the maximum short exposure of the fund is 50% of the fund's net asset value. Since the fund is a dedicated bearish fund, it intends to keep the WIG20 short exposure above 25% of net asset value.

MARKET SUMMARY

Good sentiment continues on capital markets last month because the QE2 and expansive fiscal policy support the markets adequately. The improving labour market and increasing profitability of companies are a proof that these actions were effective. An expansive monetary and fiscal policy can cause a high inflationary economic environment on a long run, wherewith we and the market count too. These events could be a reason to start rate hike cycle in the CEE region because monetary policy is behind the curve. Polish central bank was the second after Hungary who started to raise base rate to tighten money supply. We estimate around 75-100 basis point rate hike this year. In line with this view we cut back our exposure on the money market to reduce negative effects of rising short-term yields. The changes of polish pension system was the another key event of the month. The consequences of the regulation are slightly negative, but these are hid by the good international sentiment. We keep our WIG20 short position around 20% of NAV, which is the neutral because market reaction was balanced after the announcement. That's why the January performance of the fund was 0%.

NET YIELD PERFORMANCE OF THE FUND
