The asset allocation of the Fund, 31.03.2010

Hungarian T-bills	37.74%
Hungarian Government Bonds	49.55%
International Corporate Bonds	8.48%
Deposit	0.00%
Government Paper Repo	1.24%
Current account	3.00%
Other assets	-0.01%
Total investment assets	100.00%
Net corrected leverage	11.60%
Derivative products	3.25%

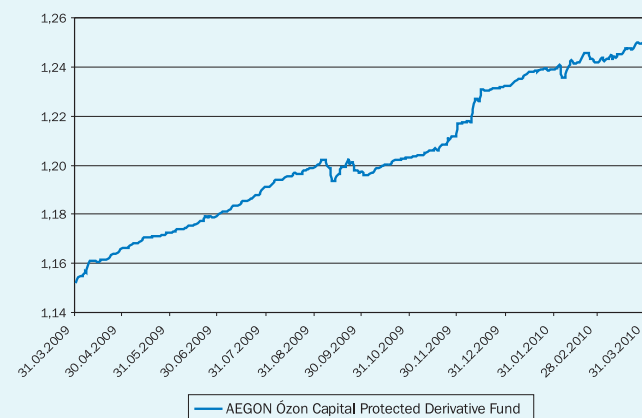

that the Fund overperformed its net benchmark by 0,13%. We have closed out our BUND short position (German 10 years bond), because the market processes did not testify our view. Our opinion however did not change considering the debt markets, although our timing was inappropriate. The Fund opened a EURRON short position (execution price: 4,142). Furthermore we also opened a RONCZK long position (execution price: 6,125). According to our expectations the Roman economy is up to a real adaptation, which will improve the currency value through the balance of payment and high yield environment in medium to long term.

NET Yield Performance of the Fund:

Time horizon	12 months*	2009 year	2008 year

** The net return of the benchmark index.

THE NET PERFORMANCE OF THE FUND BASED ON THE NET ASSET VALUE PER SHARE

Past performance is no guarantee of future results. This report should not be considered as an offer or investment advisory. The Fund Prospectus contains the detailed conditions of the investment. The distribution costs of the fund purchase can be found at the distributors.

Investment Policy of the Fund:

The aim of the fund is to give a capital-protected alternative investment opportunity which should enable clients to achieve excess return without great risk to their capital. The structure of the fund gives capital protection. At the beginning of every year, the Fund buys T-bills and keeps cash in repos and deposits, which should cover the capital protection. The remaining part of the money is invested opportunistically in various options. The options are actively traded in a range of markets (FX, equities and futures). Since the options can only be bought and sold but never written, this cannot result in a big loss, so that the capital protection can never get in danger. The capital protection means that on the first workday of every year the NAVPU of the Fund cannot be less than it was on the first workday of the previous year. The investor, who buys the Fund any time during the year, can be sure that on the first day of the next year the Fund's NAVPU will be at least as much as on the first day of the year in which he purchased the fund. However, during the year, the Fund's NAVPU can vary widely. While most option and T-bill based funds buy the options and keep them until expiry, we actively manage the portfolio, so the success, or return, of the Fund is based on whether the Fund Manager's expectations turn out to be right.
