Investment Policy of the Fund:

The aim of the fund is to give a capital-protected alternative investment opportunity which should enable clients to achieve excess return without great risk to their capital. The structure of the fund gives capital protection. At the beginning of every year, the Fund buys T-bills and keeps cash in repos and deposits, which should cover the capital protection. The remaining part of the money is invested opportunistically in various options. The options are actively traded in a range of markets (FX, equities and futures). Since the options can only be bought and sold but never written, this cannot result in a big loss, so that the capital protection can never get in danger. The capital protection means that on the first workday of every year the NAVPU of the Fund cannot be less than it was on the first workday of the previous year. The investor, who buys the Fund any time during the year, can be sure that on the first day of the next year the Fund's NAVPU will be at least as much as on the first day of the year in which he purchased the fund. However, during the year, the Fund's NAVPU can vary widely. While most option and T-bill based funds buy the options and keep them until expiry, we actively manage the portfolio, so the success, or return, of the Fund is based on whether the Fund Manager's expectations turn out to be right.

The asset allocation of the Fund, 30.04.2010

Hungarian T-bills	50.50%
Hungarian Government Bonds	31.01%
International Corporate Bonds	7.89%
Deposit	0.00%
Government Paper Repo	6.77%
Current account	3.72%
Other assets	0.10%
Total investment assets	100.00%
Net corrected leverage	12.37%
Derivative products	3.36%

Market Summary:

April was an eventful month for the international capital markets. The increased bankruptcy chance of Greece and uncertainties of the European growth have corrupted the trust in the EUR and this has caused the German government bonds to strengthen. The Fund kept its Romanian lej long positions against the EUR and CZK even after slight losses in April, because we believe, that the higher base rate does not back the relative weakness of the currency compared to similar economies.

NET Yield Performance of the Fund:
