Derivative products	0.00%

Market Summary:

The Greek bankruptcy threat left its mark also on the domestic financial markets at the end of April. Although the central bank unabated, as expected, continued to cut the base rate (to 5.25%), the HUF fragility of the Greek again became evident during the crisis. The inflation picture is never as good as before: the official price increases keep the pace of inflation high, which could also be a barrier to further rate cuts. Because of the unstable market situation, the dynamic reduction of yields in case of T-bills has stopped. In the light of the above situation we consider duration cut in the portfolio.

Investment Policy of the Fund:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or want to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money inbetween investments or for investors who are looking for a so-called "safe haven" in case of market panics.
