Total investment assets	100.00%
Net corrected leverage	9.85%
Derivative products	0.00%

Investment Policy of the Fund:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or want to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money inbetween investments or for investors who are looking for a so-called "safe haven" in case of market panics.

Market Summary:

Unfortunate statements from government circles early June – saying the Hungarian and the Greek public finance situation is parallel – caused considerable turbulence in the domestic capital markets: a significant weakening of the forint, the bond and equity markets also dropped. Af-

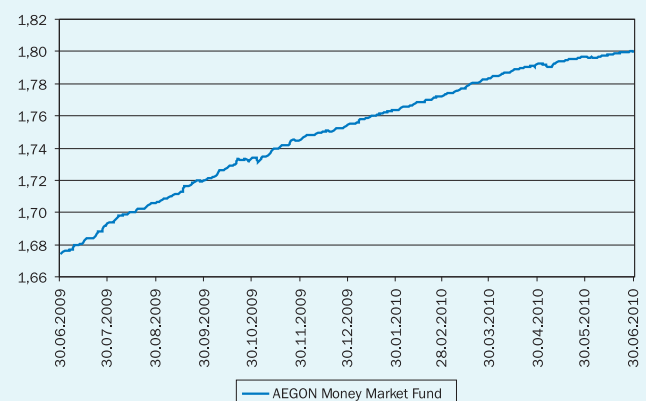

ter mixed macroeconomic data and under fragile global sentiment the markets might have overreacted the unfortunate statements of the government and the later announced economic action plan of the prime minister was unable to restore investor confidence last month. It was therefore not possible to further reduce the base rate in June. Apart of the downward correction in the middle of the month, we have only observe gradually rising short term yields and according to the yields of the bills emissions, interest rate reduction is quiet unlikely. The longer-term forward rates even suggest monetary tightening. The uncertain budget plans makes the monetary policy unpredictable, while the record strong Swiss franc means a threat to financial stability: we still tend to expect a rise in the short yields and we do not change our conservative portfolio strategy.

NET Yield Performance of the Fund:
