INVESTMENT POLICY OF THE FUND

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or want to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money inbetween investments or for investors who are looking for a so-called "safe haven" in case of market panics.

Liabilities	0.67%
Receivables	0.09%
Total investment assets	100.00%
Net corrected leverage	9.75%
Derivative products	0.00%

MARKET SUMMARY

Short term yield went up and HNB increased the base rate at the end of 2010. Two rating agencies have downgraded the Hungarian debt, it means that we are at the end of the investment category at all of the three companies. Country risk premium increased further, although it was not apparent in the currency prices as the forint was even able to appreciate slightly. Despite of stable currency, inflation fears are still present, hence HNB might use strict monetary measures, but forecasting longer term is almost impossible. Monetary Council with new close-to government delegates might change current trends from spring 2011. We keep defensive portfolio taking uncertainties into account.
