**Net Asset Value (HUF):** 218 211 137  
**Net Asset Value per share:** 1.012573

## The asset allocation of the Fund, 31.12.2009

Investment Funds' units	96.13%
Government paper repo	0.00%
Current account	1.11%
Other assets	2.77%
Total investment assets	100.00%
Derivative products	0.00%
Net corrected leverage	96.24%

with the utmost care. With the help of AEGON derivative Funds the AEGON Smart Money Investment Fund of Funds will have the opportunity of „short-selling” and thereby the ability to realize positive returns not only in rising markets, but in falling ones as well. The Fund primarily invests its capital into the investment funds, managed by AEGON Hungary Fund Management Co., but it is also allowed to invest into other investment funds, or purchase collective securities for its portfolio with the objective of diversification, or if the given asset class should not be covered by the Funds of the Fund Management Co. Indirectly, the Fund is able to reach the total investment universe known today, through the units of the investment funds (bond market, money market, stock market, real estate market, private equity, derivatives and other regulated and OTC derivative products, commodity market products, currency, etc.) and realize investments on the domestic and international level as well. To assure liquidity, the Fund can hold government bonds and treasury bills issued in the name of the Hungarian State by the Hungarian Government Debt Management Agency and distributed within the framework of the PDS – the Primary System for Distribution of Government Securities – as well as bonds issued by the National Bank of Hungary (Central Bank) and other money market instruments in its portfolio. The Fund thus takes some heavy weight off the investor's shoulders, namely: the as-

## Market Summary:

Globally markets remained strong in the last month of a very successful year. Most of them closed on the high or very close to it. At the moment the global recovery seems to be intact yet, so we expect further economic advances and in the meantime some solid but compared to 2009 not so stellar stock market gains. Still buying and holding high quality shares in stable and growing companies and regions will probably a good strategy in the coming year for investors. Our asset allocation changes reflect this theory as we increased further the

risky part in the portfolio. We halved the AEGON Money Market Fund and switched that amount into the AEGON Central European Equity Fund and into the AEGON Russia Equity Fund. The equity exposure of the fund is 25% again, instead of the previous 20% we had before. We see the CEE region as one which still offers opportunity for global investors and stocks with reasonable valuation and upside potential. Local factors will likely help the Hungarian equity market, the Czech shares seem cheap. Russia performed very well in 2009 and we still think it offers better opportunities for investors amongst the emerging world and the BRIC countries. Advancing commodity prices can fuel profit growth there. We rather underweight cash and money market instruments as early 2010 asset allocation decisions will prefer risky assets more.
