## INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish an investment portfolio with a "total return" perspective – to achieve positive return for the investor under any circumstances. The Fund attempts to reach this goal by selecting – subsequent to the application of different ways of analysis – those asset classes that bear the highest potential for appreciation. Investments are performed through the purchase of investment Fund's units and collective investment securities. According to the professional consensus, 40 percent of the return of a given portfolio is determined by the selection of the asset classes. With regard to this, one of the most important steps in carrying out investment activity is the selection of the appropriate asset class, which requires increased awareness, market experience and deeper analysis, forecasting capability, and last but not least an immense amount of time. These capabilities and resources can be found, naturally, among professional investors, and consequently it is them who make and carry out those decisions that result in the highest profit with the most advantageous risk/reward ratio. To achieve a continuously positive return the Fund actively uses risk management procedures, primarily so-called "stop-loss" procedures. Further, the sizes of positions that bear higher risk are selected with the utmost care. With the help of AEGON derivative Funds the AEGON Smart Money Investment Fund of Funds will have

the opportunity of "short-selling" and thereby the ability to realize positive returns not only in rising markets, but in falling ones as well. The Fund primarily invests its capital into the investment funds, managed by AEGON Hungary Fund Management Co., but it is also allowed to invest into other investment funds, or purchase collective securities for its portfolio with the objective of diversification, or if the given asset class should not be covered by the Funds of the Fund Management Co. Indirectly, the Fund is able to reach the total investment universe known today, through the units of the investment funds (bond market, money market, stock market, real estate market, private equity, derivatives and other regulated and OTC derivative products, commodity market products, currency, etc.) and realize investments on the domestic and international level as well. To assure liquidity, the Fund can hold government bonds and treasury bills issued in the name of the Hungarian State by the Hungarian Government Debt Management Agency and distributed within the framework of the PDS – the Primary System for Distribution of Government Securities – as well as bonds issued by the National Bank of Hungary (Central Bank) and other money market instruments in its portfolio.

The Fund thus takes some heavy weight off the investor's shoulders, namely: the asset allocation between asset classes, and switching to the appropriate Fund. The Fund has no benchmark index, but wishes to achieve a positive return under any market circumstances.

## MARKET SUMMARY

Last month of the year brought a further rise in equity markets, U.S. stock indices closed their best December since 1991. The improving growth prospects and strengthening inflation expectations favored equities. U.S. bonds continued to suffer capital outflow, the yields significantly elevated, while the higher-risk assets experienced fresh money inflow. The Funds equity weight has been slightly increased, we have continued to purchase AEGON International Equity Fund, and we have nearly doubled our Russia exposure. Considering our bond holdings, only slight modifications have been conducted: EUR and Corporate ratio increased. AEGON Smart Money Fund of Funds achieved around 7% gains in 2010, which is an outstanding performance taking the low risk taking into account.
