**Net Asset Value per share:** 1.304010

### The asset allocation of the Fund, 31.07.2009

Government paper repo	5.06%
International Equities	0.00%
Hungarian Equities	0.00%
Current account	7.80%
International Bonds	0.00%
Hungarian T-bills	42.55%
Hungarian Government Bonds	39.56%
Other assets	5.03%
Total investment assets	100.00%
Derivative products	92.83%
Net corrected leverage	112.65%

expected, the valuation is not favourable at all. Our position in gold is unchanged, we still hold it. In case of the government bonds we decreased the duration after the yield-drop, but the purchase of 5-10-year-long bonds might be reasonable at higher yield levels. The EUR/USD long position was close at the end of the month in two installments generating a substantial profit. It seems that Japanese currency might go through a remarkable weakening, although the technical picture is not yet clear. The increase in the EUR/CHF price signals that the risk rally might go on until the end of the year, which will put under pressure the fundamentally-not-too-cheap JPY sooner or later. In line with that on the last day of the month we increased further our previously (at 156.13) opened GBP/JPY long position, which is now of substantial size and has been generating serious profits so far. On the same day we opened a medium-sized EUR/JPY long position at 135.43. At the beginning we decreased, then we closed our EUR/HUF short position with a gain, since the HUF appreciated radically against the EUR in a very short time. We consider the HUF to be fundamentally overvalued, but technically strong.

### NET Yield Performance of the Fund:

Time horizon	12 months*	2008 year
Net return of the Fund*	8.56%	3.21%
Benchmark performance**	11.59%	9.70%

\* It shows the net performance of the fund until 31/07/09  
The Fund was launched on 11/05/07  
\*\* The net return of the benchmark index.

### THE NET PERFORMANCE OF THE FUND BASED ON THE NET ASSET VALUE PER SHARE

very low		moderate		high

### Market Summary:

We gladly inform our Investors that the performance of the AEGON Vision Derivative Investment Fund since its launch is over the benchmark (RMAX+3%) again. The average annual yield of the Fund since its launch has been 12.69%, the net average annual yield of the benchmark has been: 10.08%, thus the over-performance is: 2.61%. The performance of the Fund is still convincing in 2009: its YTD nominal yield is 11.85% compared to the 6.88% YTD net yield of the benchmark, resulting in a 4.97% over-performance. In July the Fund rewarded its investors with a 4.05% gain. The Fund also speculated on the futures equity markets, the Fund made a smaller long position in the S&P500 after its break-out from 950 points and closed it at the 980-990 resistance level generating a nice profit. The reason for that were the negative fundamental data and overbought technical signals. Albeit the corporate profits are better than
