Government paper repo	0.00%
Total investment assets	100.00%
Net corrected leverage	24.42%
Derivative products	21.10%

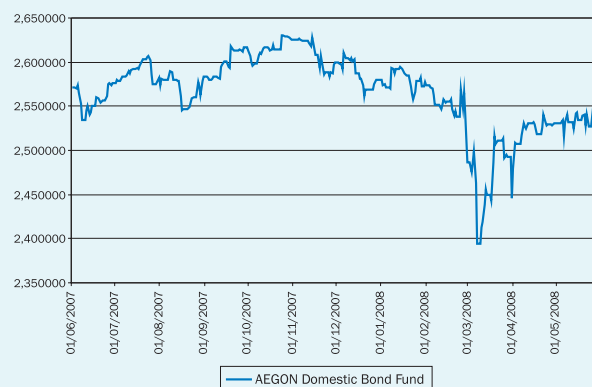

domestic bond funds in the market. This came from the fact that neither part of the yield curve moved really in the bond market. Basically the domestic bonds are extremely undervalued, especially the ones with the long duration, so the Fund has a longer duration as well. According to our opinion the long end of the yield curve can only get higher with the skin of one's teeth.

NET Yield Performance of the Fund:

Past performance is no guarantee of future results. This report should not be considered as an offer or investment advisory. The Fund Prospectus contains the detailed conditions of the investment. The distribution costs of the fund purchase can be found at the distributors.

Investment Policy of the Fund:

Only Hungarian Government Securities, debt securities guaranteed by the Hungarian state, corporate bonds, debt securities issued by local governments can get into the portfolio of the Fund. In order to decrease the risk of the portfolio the fund manager analyses the risk factors of the securities, and confirms the decisions taking with thorough calculations. By choosing a security one of the important factors is that the security should be liquid. Thanks to the professional diversification and the active portfolio management the fund provides its investors with a low risk – high yield investment alternative.
