## Investment Policy of the Fund:

Only Hungarian Government Securities, debt securities guaranteed by the Hungarian state, corporate bonds, debt securities issued by local governments can get into the portfolio of the Fund. In order to decrease the risk of the portfolio the fund manager analyses the risk factors of the securities, and confirms the decisions taking with thorough calculations. By choosing a security one of the important factors is that the security should be liquid. Thanks to the professional diversification and the active portfolio management the fund provides its investors with a low risk – high yield investment alternative.

3 months
  1 year
  2 years
  3 years
  5 years

Risc Scale

very low
  moderate
  high

## Market Summary:

In February the bond yields reached historical peaks, while the HUF weakened against the EUR to such levels that we have never seen before. Fears got higher regarding the CEE regions increasing foreign currency debt levels.

These fears were also backed by the very high level of Hungary's national debt, and by the doubt whether the country is able to lower it or not. Based on the positioning of the market we don't expect further sell-offs. We hope that the situation in the bond market is slightly getting better. Hungarian bond funds represent nowadays similar risk levels like equity funds.

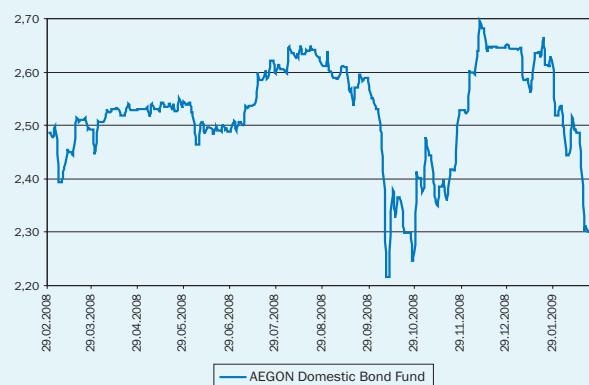

## NET Yield Performance of the Fund:
