Investment Policy of the Fund:

The AEGON Hungary Fund Management has launched this new investment fund to provide an alternative solution for those investors who are expecting a decline of the share prices on the Polish Stock Market. The Fund offers 90% capital protection by a significant share of Polish Treasury Notes. In case of declining share prices by its WIG20 put option exposure the fund ensures that the investor will get extra return on his investment. If the fund manager expects that the stock markets will go up than he reduces the option position, but if he sees higher risk in the stock markets than he will buy more put options for the WIG20 Index. Since the capital protection allows the fund manager to buy only limited amount of put options the maximum short exposure of the fund is 50% of the fund's net asset value. Since the fund is a dedicated bearish fund it intends to keep the WIG20 short exposure above 25% of net asset value.

Market Summary:

The economic reports continue to beat the drum of a deep and synchronized global downturn. Industrial activity readings are pointing towards the first double-

digit annualized decline in global manufacturing output since the mid-1970s. The global GDP "growth" will be around 0% in 2009. There will be a serious GDP slowdown in Poland also, real GDP growth will be around 1.5% in 2009 compared to the 5% in 2008. The Polish equity market had a bullish month, and the WIG20 index rose about 2.74% in December. In spite of this the AEGON Bessa lost only 0,24% in this month, and the 1 year performance of the Fund is 15.32%! We expect a little bull market (a bear market rally) in January, so we have reduced our short positions.

NET Yield Performance of the Fund:

Time Horizon 12 months

Net Return of the fund* 15.32%

* It shows the net performance of the fund until 31/12/08
 The fund was launched on 04/09/07
