Other assets	5.28%
Total investment assets	100.00%
Derivative products	0.00%
Net corrected leverage	73.17%

whilst March also started with negative records, but from the bottom of 9th (bottom of the last 12 years) the index soared 25%, which is the 3rd biggest bear market rally in the history. The current price growth can be only temporal in our view, because the fall in the American property prices could continue and the government measurements have their time barriers too. The recession could deepen further in the CEE region till the end of this year; hence we will only prefer company stocks with stable cash-flow, and low debt rate.

Investment Policy of the Fund:

The primary aspect by forming the composition of the fund is to optimise the aggregate exposure of the securities. Besides keeping an eye on the macro economical background, the fund manager uses fundamental analyses to build a well-balanced long-term equity investment portfolio. The fund manager applies widespread diversification to minimize the risk of the portfolio, and periodically also uses derivative instruments to hedge. The AEGON Domestic Equity Fund changed its name at the end of December 2006 to AEGON Central European Equity Fund. The fund uses the new investment policy form 8 January 2007. From 1998 to 2006 the Fund invested only in Hungarian stocks, and from 2007 it started investing in CEE stocks. The reason of the change was the falling number of liquid Hungarian stocks due mergers and delistings. Investing in CEE stock also lowers the risk of the portfolio. After managing one of the best performing domestic equity fund, we hope that we will reach similar outstanding performance in the future by investing in the CEE market. Certainly the fund changed its benchmark also from 80% RAX + 20% RMAX to 80% CETOP20 + 20% ZMAX.
