| Derivative products | 45.44% |

Investment Policy of the Fund:

Hungary's first total return fund, the Aegon Moneymaxx Express Fund opened a new category in the Hungarian investment fund market. We launched this fund because a lot of our clients pointed out, that they don't feel experienced enough in the field of investment, so it is pretty hard for them to decide in which fund they should invest into. The constantly changing market situation generates also a big dilemma for the investors: when and how should they reallocate their portfolio? The Moneymaxx Express Fund eases these needs, and takes the responsibility for taking the right investment decision for those private investors who can get familiar with moderate risk, and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest into any kind of Hungarian bond or equity, or it can invest even into international bonds or equities. The fund manager's financial leeway is very wide - certainly by paying maximal attention to the compliance with the law - this means on one hand 100% of the portfolio can be invested in equities, or on the other hand the portfolio can contain 100% T-bills. We recommend this Fund to those investors who are willing to take more risk (in some cases the risk could get similar to investing into equity funds) and who prefer that their savings will be constantly managed, and transferred from one asset class to the other tunelessly to the changing market situation and the anticipation of professional portfolio managers.

Market Summary:

The year to date net yield performance of the AEGON MoneyMaxx Expressz Mixed Fund is negative. This came from two

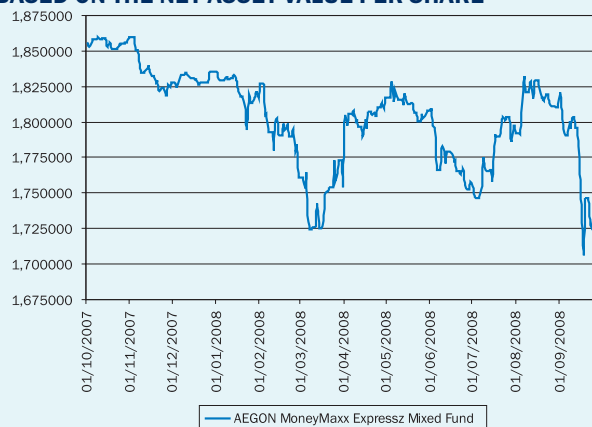

factors: although the equity exposure of the fund was very low (around 20%) it generated serious losses, and the Hungarian government securities part of the portfolio dropped a lot too. The prices of the risky assets almost collapsed since the bank crisis has started. The Hungarian bond market wasn't an exception either: the MAX index fell almost by 4% in the last weeks. Equity, bond, and foreign currency investors suffered heavy losses. We will keep the 20 percent equity exposure in the future too - to limit further losses -, and the other part of the portfolio will be in bonds. Hungarian government bonds offer very tempting yield levels.

NET Yield Performance of the Fund:

| Time horizon | 12 months | 2007 year | 2006 year | 2005 year | 2004 year |
|-------------------------|-----------|-----------|-----------|-----------|-----------|
| Net return of the Fund* | -8.83% | 10.96% | 10.48% | 22.40% | 21.50% |
| Benchmark performance** | 5.37% | 5.67% | 4.62% | N/A | N/A |

* It shows the net performance of the fund until 30/09/08
The Fund was launched on 11/12/03
** The net return of the benchmark index.
