The asset allocation of the Fund, 31.03.2008.

Hungarian T-bills	87.66%
Government paper repo	10.49%
Current account	1.16%
Other assets	0.69%
Total investment assets	100.00%
Net corrected leverage	9.46%
Derivative products	0.00%

was that we bought put options on major equity indexes at the end of February and at the beginning of March. We exercised these options at the end of March, and bought call options on the German DAX equity index. Our investment policy is still the same: we invest the major part of the portfolio in Hungarian T-bills, and we buy options for the 0,25–1% of the fund's asset value. By using this method we can keep the risk constantly limited, and we also have a good chance to profit from the equity, currency and other capital market movements.

NET Yield Performance of the Fund:

Time horizon	12 months*
Net return of the Fund*	8.16%
Benchmark performance**	5.33%

* It shows the net performance of the fund until 31/03/08
The Fund was launched on 19/03/07
** The net return of the benchmark index.

THE NET PERFORMANCE OF THE FUND BASED ON THE NET ASSET VALUE PER SHARE

Past performance is no guarantee of future results. This report should not be considered as an offer or investment advisory. The Fund Prospectus contains the detailed conditions of the investment. The distribution costs of the fund purchase can be found at the distributors.

Investment Policy of the Fund:

The aim of the fund is to give a capital-protected alternative investment opportunity which should enable clients to achieve access return without risking their capital. The structure of the fund itself gives the capital protection: At the beginning of every year, the Fund buys T-bills and keeps cash in repos and deposits which should cover its capital protection. The remaining part of the money is invested opportunistically in various options. The options are actively traded in a range of markets (FX, equities, futures) but since they can only be bought and sold but never written, this can not result in a big loss, so the capital protection can never be in danger. The capital protection means that on the first workday of every year the NAV of the Fund can not be less than at the first workday of the previous year. The investor, who buys the Fund any time during the year can be sure that on the first day of the next year the Fund's NAV will be at least as much as on the first day of this year. However, during the year, the Fund's NAV can vary widely. Another important feature of the Fund is that while most option-and T-bill based funds buy the options and keep them until expiry, we actively manage the portfolio, so the success (return) of the Fund depends on whether the Fund Manager's expectations turn out to be right.

Investment horizon:
