Derivative products	0.00%

Investment Policy of the Fund:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this the fund is only allowed to hold very safe investments like t-bills and Hungarian government bonds which duration is lower than one year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than one year, the volatility of the fund is also very low, much lower than the volatility of a bond fund, which can contain longer government bonds as well. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills. We recommend the fund for those investors whose investment horizon is shorter than one year and/or who wants to run very low risk only. The Fund is also recommended for those who seek higher returns than the rates of the time deposits, but need quick access to their savings. It is ideal to hold the money between investments, or for investors who are looking for a so-called safe havens in case of market panics.

very low
 moderate
 high

Market Summary:

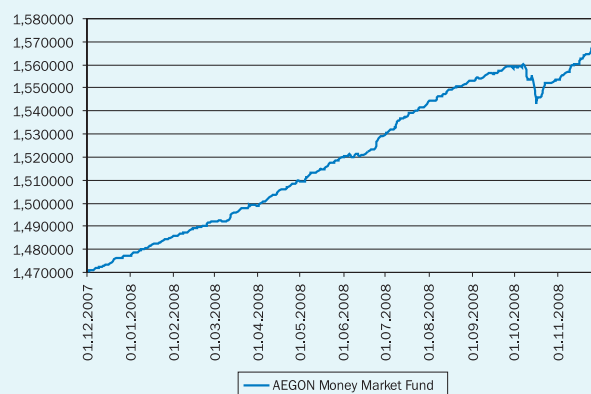

During November there were more major facts that influenced the money market processes in Hungary. The central banks of the world aggressively lowered their key interest rates in November, since recession is here, and inflation isn't a threat nowadays. According to these moves the National Bank of Hungary could lower its key interest rate by 50bps to 11%. There will be more rate cuts in the near future, since the Hungarian inflation expectation is constantly lowering. The fund manager changed the mix of the portfolio (we used to keep cash overweight) and invested into t-bills with longer duration so investors could profit from the high yields offered by these securities.
